The Dance of Air and Sea Arnold H. Taylor, 2011-02-24 How can the tiny plankton in the sea just off Western Europe be affected by changes 6000 km away on the other side of the North Atlantic Ocean? How can a slight rise in the temperature of the surface of the Pacific Ocean have a devastating impact on amphibian life in Costa Rica? Living populations across the globe are connected by great swayings of the world's atmosphere and oceans, the largest of which is El Niño. For almost half a century, the numbers of some of the smallest animals in the North Sea have gone up and down as the Gulf Stream has moved north and south 4000 miles away at the coast of the USA. This connection has happened because the weather patterns over the North Atlantic are intertwined by a phenomenon first described by a Danish missionary in the eighteenth century, the North Atlantic Oscillation. In *The Dance of Air and Sea*, Arnold Taylor focuses on the large-scale dynamics of the world's climate, looking at how the atmosphere and oceans interact and the ways in which ecosystems in water and on land respond to changes in weather. He tells stories of how discoveries were made and the scientists who made them, and he considers the crucial issues of how the discoveries aid our response to global warming.

Cultural Politics and Political Culture in Postmodern Europe, 1997-01-01 The present volume assembles essays from a broad cultural and professional spectrum around the question of European cultural identity The heterogeneity of the contributors their differing points of departure and methods attests to a tension in intellectual communities which today is more intense than ever Europe's identity crisis is not merely an empirical matter It reflects a far deeper and far older discursive crisis The mandate of Europe's traditional intellectual institutions to preserve and police their own cultural heritage has proved incapable of evolving in a manner sufficient to account for the mutation in its object European culture It is not merely that Europe's identity like any identity in the flux of history has changed Rather the notion of identity the very basis of any questions of who we are where we are going and the appropriate political forms and social institutions for further existence all rely on a logic of identity which has at best become extremely problematic It is this problematization which provides the common thread unifying the following essays Each contributor in his/her own way and with respect to his/her own research object confronts the adequacy of the concept of cultural identity The hidden presuppositions of this concept are indeed remarkable and the logic of cultural identity prescribes that they remain undisclosed
