Seapower States Andrew Lambert, 2018-11-27 A fascinating geopolitical chronicle. A superb survey of the perennial opportunities and risks in what Herman Melville called the watery part of the world. *The Wall Street Journal*. In this volume one of the most eminent historians of our age investigates the extraordinary success of five small maritime states. Andrew Lambert, author of *The Challenge Britain Against America in the Naval War of 1812*, winner of the prestigious Anderson Medal, turns his attention to Athens, Carthage, Venice, the Dutch Republic, and Britain, examining how their identities as seapowers informed their actions and enabled them to achieve success disproportionate to their size. Lambert demonstrates how creating maritime identities made these states more dynamic, open, and inclusive than their lumbering continental rivals. Only when they forgot this aspect of their identity did these nations begin to decline. Recognizing that the United States and China are modern naval powers rather than seapowers is essential to understanding current affairs as well as the long-term trends in world history. This volume is a highly original, big-think analysis of five states whose success and eventual failure is a subject of enduring interest by a scholar at the top of his game. An intriguing series of stories of communities thinking seriously about how to stand their own ground when outpowered, how to do so in ways that are consistent with their values, and sometimes how to negotiate the descent from being a great power when the cards just aren't in their favor any more. These are timely questions. *Times Higher Education Supplement*. Lambert is without a doubt the most insightful naval historian writing today. *The Times*.

The Interest of America in Sea Power, Present and Future (Dodo Press) Alfred Thayer Mahan, 2008-03 Alfred Thayer Mahan (1840-1914) was a United States Navy officer, geostrategist, and educator. His ideas on the importance of sea power influenced navies around the world and helped prompt naval buildups before World War I. Despite his success in the Navy, his skills in actual command of a ship were not exemplary, and a number of vessels under his command were involved in collisions. On the other hand, the books he wrote ashore made him arguably the most influential naval historian. In 1885 he was appointed lecturer in naval history and tactics at the Naval War College. Before entering on his duties, Mahan was pointed to write his future studies and lectures on the influence of sea power. He organized his lectures into his most influential books, *The Influence of Sea Power upon History, 1660-1783* (1890). To a modern reader, his emphasis on sea-borne commerce may seem commonplace, but the notion was much more radical in Mahan's time. His other works include *The Interest of America in Sea Power, Present and Future* (1897) and *Types of Naval Officers* (1902).

The Influence of Sea Power Upon History, 1660-1783 (Annotated) Alfred Thayer Mahan, 2020-04-09 Differentiated book. It has a historical context with research of the time. The influence of sea power on history, 1660-1783, is a naval war story published in 1890 by Alfred Thayer Mahan. He details the role of sea power during the 17th and 18th

centuries and discussed the various factors necessary to support and achieve sea power with an emphasis on having the largest and most powerful fleet. Academics considered it the most influential book in naval strategy. Its policies were quickly adopted by most major navies which eventually led to the First World War naval arms race. It is also cited as one of the factors contributing to the United States becoming a great power. Mahan formulated his concept of sea power while reading a history book in Lima, Peru. The book was published by Mahan while he was president of the United States Naval War College and was the culmination of his ideas about naval warfare. Mahan began the book with an examination of the factors that led to the supremacy of the seas, especially how Britain was able to achieve its near dominance. He identified characteristics such as geography, population, and government and expanded the definition of maritime power as a strong commercial and naval fleet. Mahan also promoted the belief that any army would succumb to a strong naval blockade.
