Marine Mammals Nick Gales, Mark Hindell, Roger Kirkwood, 2003 Brings together contributions from 68 leading scientists from 12 countries to provide an up to date review on the way we manage our interactions with whales dolphins seals and dugongs

Seals, Fur Seals, Sea Lions, and Walrus IUCN/SSC Seal Specialist Group, 1993

African Rhino Richard Emslie, 1999 The black and the white rhinoceros have become flagship species for international conservation They are significant not only for the continuation of a major evolutionary heritage but also as symbols for the protection of African savannahs The battle for the survival of these species has been marked by some notable successes and sadly many failures and the situation is still critical The international horn trade ban and the domestic bans imposed in most traditional user states have driven the trade further underground in some cases inflating prices and making illegal dealing even more lucrative This Plan is aimed at donors government and non government organizations and all those involved in rhino conservation It outlines the actions and strategies needed to catalyse support for these majestic animals and help secure their future in sub Saharan Africa The overall conclusion is that given the political will stability and adequate field expenditure rhinos can be conserved in the wild

Microchiropteran Bats Anthony Michael Hutson, Anthony M. Hutson, Simon P. Mickleburgh, P. A. Racey, 2001

Priorities for the Conservation of Mammalian Diversity Abigail Entwistle, Nigel Dunstone, 2000-07-20 Scientific yet accessible review of mammalian conservation as a model demonstrating wider issues in conservation

Walker's Marine Mammals of the World Ronald M. Nowak, 2003-05-28 Marine mammals are among the most fascinating and most watched of Earth's many animal species particularly for their many adaptations for life in and around the water and their unique methods of communication This comprehensive guide to the order is for experts and enthusiasts alike

Oceanography of the East Sea (Japan Sea) Kyung-Il Chang, Chang-Ik Zhang, Chul Park, Dong-Jin Kang, Se-Jong Ju, Sang-Hoon Lee, Mark Wimbush, 2015-09-15 This book reviews the research in various fields of oceanography on the responses of the East Japan Sea to climate change The uniqueness of the East Japan Sea comes from the rapid and amplified response to climate change which includes long terms trends of physical and chemical parameters at a rate that almost doubles or even higher the global rate This book aims to provide in an organized way the results from the previously published knowledge but also to introduce an updated view of the research recently carried out The book is divided into several parts that comprise the physical chemical biological and geological aspects of the region and fisheries This book is made for researchers and students working on climate variability as well as for the oceanography community working on world's marginal seas The research presented in this work will also benefit to researchers from other fields such as social scientists and environmentalists and also policy makers

Equids--zebras, Asses, and Horses Patricia Des Roses Moehlman, IUCN/SSC Equid Specialist Group, 2002 The new Equid Action Plan provides current knowledge on the biology ecology and conservation status of wild zebras asses and horses It specifies what information is lacking and prioritizes

needed conservation actions The Action Plan also provides chapters on equid taxonomy genetics reproductive biology and population dynamics These chapters highlight unsolved issues of taxonomy and genetics They also provide information and insight into the special demographic and genetic challenges of managing small populations The chapter on disease provides a review of documented equine disease and epidemiology and focuses on priorities for equid conservation health The final chapter deals with the importance of developing an assessment methodology that explicitly considers the role of equids in ecosystems and the ecological processes that are necessary for ecosystem viability The approach of combining ecological field studies and ecosystem modeling should prove useful for the scientific management and conservation of wild equids worldwide These chapters provide research and conservation practitioners with new information and paradigms **Annual**

Report of the Marine Mammal Commission United States. Marine Mammal Commission,1984 Marine Policy and Economics ,2010-10-25 Elements of Physical Oceanography is a derivative of the Encyclopedia of Ocean Sciences Second Edition and serves as an important reference on current physical oceanography knowledge and expertise in one convenient and accessible source Its selection of articles all written by experts in their field focuses on ocean physics air sea transfers waves mixing ice and the processes of transfer of properties such as heat salinity momentum and dissolved gases within and into the ocean Elements of Physical Oceanography serves as an ideal reference for topical research References related articles in physical oceanography to facilitate further research Richly illustrated with figures and tables that aid in understanding key concepts Includes an introductory overview and then explores each topic in detail making it useful to experts and graduate level researchers Topical arrangement makes it the perfect desk reference North American Rodents David J. Hafner,1998 The first comprehensive treatment of North American rodents of conservation concern This action plan summarizes the rodent fauna of North America and provides available information on every rodent taxon that has been considered to be of conservation concern by state provincial and private conservation agencies and regional experts It is hoped that the survey provided in this action plan will serve as a common ground for all these parties in drawing up conservation strategies for rodents Marine Mammals ,1995 Curassows, Guans and Chachalacas Cracid Specialist Group,2000 Curassaows Guans and Chachalacas Status Survey and Conservation Action Plan for Cracids 2000 200

Orchids IUCN/SSC Orchid Specialist Group,1996 This action plan chronicles the threats faced by wild orchids but more importantly to critical habitats that host extraordinarily high orchid diversity and endemism It explores and recommends specific ways that national and local government legislators scientists and orchid conservationists as well as growers can all help to reverse present trends The facts and viewpoints presented in this comprehensive document update and supplement the information available to conservation organizations and agencies through the world so that they can lobby their appropriate government offices more effectively **Tapirs** Daniel M. Brooks,Richard E. Bodmer,Sharon Matola,1997

Descended from a long and ancient lineage tapirs are important tropical forest seed dispersers However today all species of

tapirs are threatened to various degrees by habitat destruction and hunting This action plan was written with wildlife biologists ecologists administrators educators and local conservation officials in mind and is aimed at those countries with tapir populations It provides a brief natural history of each species and its objective is to aid in their conservation by catalyzing conservation action In addition it is hoped that the contents of the plan will stimulate further research into this fascinating group of animals

Tropical Pinnipeds Juan J. Alava, 2017-07-12 Pinnipeds are a fascinating group of marine mammals that play a crucial role as apex predators and sentinels of the functioning and health of marine ecosystems They are found in the most extreme environments from the Polar regions to the tropics Pinnipeds are comprised of about 34 species and of those at least 25% live permanently in tropical zones This book reviews and updates current research on the biology marine ecology bio monitoring and conservation of tropical pinniped populations including their behavior anthropogenic stressors and health It also looks at challenges to be faced for the conservation of tropical pinnipeds many of which are threatened species

Eurasian Insectivores and Tree Shrews R. David Stone, IUCN/SSC Insectivore, Tree-Shrew, and Elephant-Shrew Specialist Group, 1995 This Action Plan highlights the biological importance of these species reviews current knowledge and identifies those at risk and the causes critical areas for conservation and specific conservation projects

Annual Report to Congress United States. Marine Mammal Commission, 1994

Antelopes David P. Mallon, Steven Charles Kingswood, 2001 Antelope herds numbering in the tens of thousands formerly occurred across the steppes and semideserts of Eurasia and India but these have nearly all been reduced to fractions of their earlier size antelope populations are now fragmented across the region and during recent decades several species have disappeared altogether Threats include hunting loss of habitat population fragmentation inadequate protected area coverage poorly developed administrative structures under resourcing of conservation programmes and lack of enforcement of existing legislation Rising human population growth and economic development constantly increases pressure on land and natural resources There is a consequent need for integrated rural development and community based conservation projects which have the full participation of local people at the planning and execution stages This publication Part 4 of the Global Antelope Survey covers 37 countries in the region and actions to conserve antelope populations are listed in each country report

Marine Mammal Biology A. Rus Hoelzel, 2009-04-01 This book provides a general introduction to the biology of marine mammals and an overview of the adaptations that have permitted mammals to succeed in the marine environment Each chapter written by experts in their field will provide an up to date review and present the major discoveries and innovations in the field Important technical advances such as satellite telemetry and time depth recorders will be described in boxes

Seals Fur Seals Sea Lions And Walrus Status Survey And Conservation Action Plan: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels enthralling the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the captivating narratives that have charmed audiences this year. Seals Fur Seals Sea Lions And Walrus Status Survey And Conservation Action Plan : Colleen Hoovers "It Ends with Us" This heartfelt tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and thrilling novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
