**Seamarks** John Michael Naish,1985-12-01      The Rise of an Early Modern Shipping Industry Rosalin Barker,2011 Whitby has made a huge contribution to the maritime history of Britain and this book examines how it came to prominence Commercial entrepreneurship brought about the growth of Whitby's shipping industry      *Maritime Science and Technology: Changing Our World* Nigel Watson,2015-01-01 This book addresses some key questions Did the marine sector drive the developing technologies Or did it just adopt them It would appear that the former is the case as the industry has moved from sail to steam from steam to internal combustion engines from wood to steel and to increasing sizes and types of specialist vessels the pioneers of naval architects and marine engineers have applied the latest technologies and our global society has benefited      **Coast: Our Island Story** Nicholas Crane,2010-10-31 Along our shores towering cliffs from the age of the dinosaurs rise beside wide estuaries teeming with wildlife while Victorian ports share waterfronts with imposing fortifications And the people who have lived worked and played on this spectacular coast from Stone Age fishermen to seafarers chart makers and surfers have an incredible tale to tell Coast Our Island Story is an enthralling account sparkling with geography history adventure and eccentric characters told with Nick Crane's trademark charisma and wit      **The Historical Development of the Port of Faversham 1580-1780** Paul Wilkinson,2006 This work is the first comprehensive historical and archaeological investigation into the maritime organization of the port of Faversham Kent SE England The period examined is 1580 1780 Faversham a multi functional town was well placed to take advantage of its maritime position in the Swale its closeness to Canterbury and the need to ship grain to London from this fertile crescent of North Kent An examination of the original and early development of the port is complemented by an analysis of the ships and port administration Unique methods of ship operation and manning are investigated and a comprehensive survey of the shipping fleets of Kent during their formative years undertaken This study is also concerned with analyzing the variety of mercantile responses to marketing opportunities Apart from providing London with ever increasing agricultural cargoes and return cargoes of manufactured goods Faversham developed a very healthy trade in wool oysters fishing and the manufacture of gunpowder This movement of commodities is investigated and the inter play between changes in production patterns assessed while the significance of the maritime development of the port provides ample scope for pioneering a study of port logistics and organization An examination of the origins and early developments of Faversham's maritime industry is long overdue and the uncovering of new evidence makes it possible to unravel the complexities of this mercantile activity during Faversham's formative years      **Seafaring in the Arabian Gulf and Oman** Dionisius A. Agius,2012-12-06 This book is a study of the seafaring communities of the Arabian Gulf and Oman in the past 150 years It analyses the significance of the dhow and how coastal communities interacted throughout their long tradition of seafaring In addition to archival material the work is based on extensive field research in which the voices of seamen were recorded in over 200 interviews The book

provides an integrated study of dhow activity in the area concerned and examines the consciousness of belonging to the wider culture of the Indian ocean as it is expressed in boat building traditions navigational techniques crew organisation and port towns People of the Dhow brings together the different measures of time past the sea its people and their material culture The Arabian Gulf and Oman have traditionally shared a common destiny within the Western Indian Ocean The seasonal monsoonal winds were fundamental to the physical and human unities of the seafaring communities producing a way of life in harmony with the natural world a world which was abruptly changed with the discovery of oil What remains is memories of a seafaring past a history of traditions and customs recorded here in the recollections of a dying generation and in the rich artistic heritage of the region **Keeper's Log** ,1986 *The Marvelous Clouds* John Durham Peters,2015-06-19 An ambitious re writing a re synthesis even of concepts of media and culture It is nothing less than an attempt at a history of Being Los Angeles Review of Books When we speak of clouds these days it is as likely that we mean data clouds or network clouds as cumulus or stratus In their sharing of the term both kinds of clouds reveal an essential truth that the natural world and the technological world are not so distinct In *The Marvelous Clouds* John Durham Peters argues that though we often think of media as environments the reverse is just as true environments are media Peters defines media expansively as elements that compose the human world Drawing from ideas implicit in media philosophy Peters argues that media are more than carriers of messages they are the very infrastructures combining nature and culture that allow human life to thrive Through an encyclopedic array of examples from the oceans to the skies *The Marvelous Clouds* reveals the long prehistory of so called new media Digital media Peters argues are an extension of early practices tied to the establishment of civilization such as mastering fire building calendars reading the stars creating language and establishing religions New media do not take us into uncharted waters but rather confront us with the deepest and oldest questions of society and ecology how to manage the relations people have with themselves others and the natural world A wide ranging meditation on the many means we have employed to cope with the struggles of existence from navigation to farming meteorology to Google *The Marvelous Clouds* shows how media lie at the very heart of our interactions with the world around us *Seapower States* Andrew Lambert,2018-11-27 A fascinating geopolitical chronicle A superb survey of the perennial opportunities and risks in what Herman Melville called the watery part of the world *The Wall Street Journal* In this volume one of the most eminent historians of our age investigates the extraordinary success of five small maritime states Andrew Lambert author of *The Challenge Britain Against America in the Naval War of 1812* winner of the prestigious Anderson Medal turns his attention to Athens Carthage Venice the Dutch Republic and Britain examining how their identities as seapowers informed their actions and enabled them to achieve success disproportionate to their size Lambert demonstrates how creating maritime identities made these states more dynamic open and inclusive than their lumbering continental rivals Only when they forgot this aspect of their identity did these nations begin to decline Recognizing that the United States and China are modern naval powers

rather than seapowers is essential to understanding current affairs as well as the long term trends in world history This volume is a highly original big think analysis of five states whose success and eventual failure is a subject of enduring interest by a scholar at the top of his game An intriguing series of stories of communities thinking seriously about how to stand their own ground when outpowered how to do so in ways that are consistent with their values and sometimes how to negotiate the descent from being a great power when the cards just aren't in their favor any more These are timely questions Times Higher Education Supplement Lambert is without a doubt the most insightful naval historian writing today The Times
