**Imagining Future War** Antulio J. Echevarria II, 2007-04-30 Rapid and momentous technological changes at the turn of the 20th century forced military professionals and educated civilians to envision the future of war and warfare especially during an age where nations found themselves aggressively competing for dominance on the world stage Antulio J Echevarria II offers a comparative study of these predictions to assess who got it right and why He concludes that professionals were particularly adept at predicting the warfare of the immediate future by framing their discussions in terms of solving tactical problems but they were much less successful at thinking of the long term Unburdened by the necessity of strategic problem solving educated amateurs were allowed more flexibility to imagine the long term future of warfare and at times proved to be remarkably accurate Echevarria organizes his study by comparing visions of future wars on land at sea undersea and in air In each instance professionals and amateurs had their own distinctive imaginings Among the notable speculators included in this book are science fiction author H G Wells and military theorist Ivan Bloch This approach to the study of warfare is one of those rare examples of a book that can appeal to and

inform a wide cross section of readers      *Continental Powers and Naval Development* Brian C. Chao, 2025-10-16 This book examines how continental great powers have attempted to develop and wield strong navies since 1801. *Continental Powers and Naval Development* argues that a continental great power's ability to build and effectively use a strong navy is greatly affected by two factors: a naval force design capable of executing national strategy (strategy coherence) and the deployment of that navy to places or for purposes that minimize the dominant naval power's threat perception (threat diffusion). Each factor is deceptively difficult for a continental great power to achieve, but through an analysis of four historical case studies, this book shows how both factors are vital, not just for successful naval development but for keeping the peace among great powers. Finally, it highlights how states commonly thought of as unnatural naval powers can nonetheless achieve their political objectives at sea. This book will be of much interest to students of naval history, maritime strategy, and International Relations.
