*Artificial Intelligence and Problem Solving* Danny Kopec, Christopher Pileggi, David Ungar, Shweta Shetty, 2016-06-29 This book lends insight into solving some well known AI problems using the most efficient problem solving methods by humans and computers The book discusses the importance of developing critical thinking methods and skills and develops a consistent approach toward each problem This book assembles in one place a set of interesting and challenging AI type problems that students regularly encounter in computer science mathematics and AI courses These problems are not new and students from all backgrounds can benefit from the kind of deductive thinking that goes into solving them The book is especially useful as a companion to any course in computer science or mathematics where there are interesting problems to solve Features Addresses AI and problem solving from different perspectives Covers classic AI problems such as Sudoku Map Coloring Twelve Coins Red Donkey Cryptarithms Monte Carlo Methods Rubik s Cube Missionaries Cannibals Knight s Tour Monty Hall and more Includes a companion disc with source code solutions figures and more Offers playability sites where students can exercise the process of developing their solutions Describes problem solving methods that might be applied to a variety of situations eBook Customers Companion files are available for downloading with order number proof of purchase by writing to the publisher at [info\\_merclearning.com](mailto:info_merclearning.com)

Distributed Constraint Problem Solving and Reasoning in Multi-agent Systems Weixiong Zhang, Volker Sorge, 2004 Distributed and multi agent systems are becoming more and more the focus of attention in artificial intelligence research and have already found their way into many practical applications An important prerequisite for their success is an ability to flexibly adapt their behavior via intelligent cooperation Successful reasoning about and within a multiagent system is therefore paramount to achieve intelligent behavior Distributed Constraint Satisfaction Problems DCSPs and Distributed Constraint Optimization minimization Problems DCOPs are perhaps ubiquitous in distributed systems in dynamic environments Many important problems in distributed environments and systems such as action coordination task scheduling and resource allocation can be formulated and solved as DCSPs and DCOPs Therefore techniques for solving DCSPs and DCOPs as well as strategies for automated reasoning in distributed systems are indispensable tools in the research areas of distributed and multi agent systems They also provide promising frameworks to deal with the increasingly diverse range of distributed real world problems emerging from the fast evolution of communication technologies The volume is divided in two parts One part contains papers on distributed constraint problems in multi agent systems The other part presents papers on Agents and Automated Reasoning

MICAI 2008: Advances in Artificial Intelligence Alexander Gelbukh, Eduardo F. Morales, 2008-10-07 The Mexican International Conference on Artificial Intelligence MICAI a yearly international conference series organized by the Mexican Society for Artificial Intelligence SMIA is a major international AI forum and the main event in the academic life of the country s growing AI community In 2008 Mexico celebrates the 50th anniversary of development of computer science in the country in 1958 the first computer was

installed at the National Autonomous University of Mexico UNAM Nowadays computer science is the country's fastest growing research area The proceedings of the previous MICA I events were published by Springer in its Lecture Notes in Artificial Intelligence LNAI series vol 1793 2313 2972 3789 4293 and 4827 Since its foundation in 2000 the conference has been growing in popularity and improving in quality This volume contains the papers presented at the oral session of the 7th Mexican International Conference on Artificial Intelligence MICA I 2008 held October 27-31 2008 in Atizapán de Zaragoza Mexico The conference received for evaluation 363 submissions by 1 032 authors from 43 countries see Tables 1 and 2 This volume contains revised versions of 94 papers by 308 authors from 28 countries selected according to the results of an international reviewing process Thus the acceptance rate was 25.9% The book is structured into 20 thematic fields representative of the main current areas of interest for the AI community plus a section of invited papers
