Paul Shuch, 2011-02-14 This book is a collection of essays written by the very scientists and engineers who have led and continue to lead the scientific quest known as SETI the search for extraterrestrial intelligence Divided into three parts the first section The Spirit of SETI Past written by the surviving pioneers of this then emerging discipline reviews the major projects undertaken during the first 50 years of SETI science and the results of that research In the second section The Spirit of SETI Present the present day science and technology is discussed in detail providing the technical background to contemporary SETI instruments experiments and analytical techniques including the processing of the received signals to extract potential alien communications In the third and final section The Spirit of SETI Future the book looks ahead to the possible directions that SETI will take in the next 50 years addressing such important topics as interstellar message construction the risks and assumptions of interstellar communications when we might make contact what aliens might look like and what is likely to happen in the aftermath of such a contact *SETI, the Search for Extraterrestrial Intelligence*, 1990 **Looking for Life in the Universe** Ellen Jackson, 2002 Investigates how scientists particularly Jill Tarter Director of the SETI Institute in Mountain View California use twenty first century technology to investigate whether life exists on other planets **Waiting for Contact** Lawrence Squeri, 2016-08-31 A cogent engaging history of humanity's most ambitious quest seeking outward for other minds David Brin author of *Existence* A fascinating perspective on humankind's obsession for knowing if there is anyone else out there Gerrit L Verschuur author of *The Invisible Universe* The Story of Radio Astronomy Squeri has written what will likely be the definitive history of the early days of SETI that includes profiles of some of its leading characters Ben Zuckerman coeditor of *Extraterrestrials Where Are They* An insightful history that explores the scientific foundations of the modern day search for our place in the cosmos *Waiting for Contact* delivers unparalleled access to the inner history of SETI and invites us to ride along on the journey to answer one of science's ultimate questions Are we alone Douglas Vakoch president METI International *Waiting for Contact* is a balanced account telling the tale of the search for extraterrestrial intelligence without the overpromise usually trumpeted by enthusiastic proponents and the hyperventilation so commonly added by UFO enthusiasts If you are simply interested in the history unvarnished by an agenda you'll enjoy this book Don Lincoln author of

Alien Universe Extraterrestrial Life in Our Minds and in the Cosmos Imagine a network of extraterrestrials in radio contact with each other across the universe superior beings who hail from advanced civilizations quadrillions of miles away just waiting for Earth to tune in Some people believe it s only a matter of time before we discover the right station Waiting for Contact tells the story of the Search for Extraterrestrial Intelligence SETI movement which emerged in 1959 as astronomers began using radio telescopes to listen for messages from space New technological developments turned what once was speculation into science Boosted by support from Frank Drake Philip Morrison Carl Sagan and the genre of science fiction the SETI movement gained followers and continues to capture imaginations today In this one of a kind history Lawrence Squeri looks at the people reasons goals and mindsets behind SETI He shows how it started as an expression of the times a way out of Cold War angst with hope for a better world SETI s early advocates thought that with guidance from technically and ethically advanced outsiders humanity might learn how to avoid horrors like nuclear annihilation and societal collapse from overpopulation Some hoped that good news from outer space might reveal a cure for cancer or even the secret of immortality Squeri also describes the challenges SETI has faced over the years the struggle to be taken seriously by the scientific community and by NASA competition for access to radio telescopes perpetual lack of funding and opposition from influential politicians He covers the rise and fall of Soviet SETI and the few rare meetings between Soviet and American astronomers Despite many setbacks the movement pressed forward with the aid of private donations and developed outreach programs Volunteers can now help search for new civilizations on their personal computers by joining the SETI Home project Today SETI researchers continue to see themselves as explorers They often identify with Columbus and just as Columbus never realized the full implications of his discovery we cannot predict what will happen if contact is made This book points out that if against all expectations the embattled SETI movement finally succeeds the long awaited first signal picked up by its radio antennas will usher the greatest shift in human history A new adventure will begin Lawrence Squeri is professor emeritus of history at East Stroudsburg University

Confessions of an Alien Hunter Seth Shostak, 2009-03-17 Aliens are big in America Whether they ve arrived via rocket flying saucer or plain old teleportation they ve been invading infiltrating or inspiring us for decades and they ve fascinated moviegoers and television watchers for more than fifty years About half of us believe that aliens really exist and millions are convinced they ve visited Earth For twenty five years SETI has been looking for the proof and as the program s senior astronomer Seth Shostak explains in this engrossing book it s entirely possible that before long conclusive evidence will be found His informative entertaining report offers an insider s view of what we might realistically expect to discover light years away among the stars Neither humanoids nor monsters says Shostak in fact biological intelligence is probably just a precursor to machine beings enormously advanced artificial sentients whose capabilities and accomplishments may have developed over billions of years and far exceed our own As he explores what if anything they would tell us and what their existence would portend for humankind and the cosmos he introduces a colorful
