Gill,2017-07-31 This book explores the philosophical religious thought of Soren Kierkegaard Ludwig Wittgenstein and Nikos Kazantzakis in relation to the concept of transcendence Each of these thinkers has made a strong impact on Western religious and philosophical thought but each from a nearly completely different angle as well as from a different national background This comparative study therefore crosses both national and perspectival boundaries Each of the three thinkers struggled with the notion of transcendence but in uniquely distinct fashion The conclusion offers yet a third model the author s for understanding transcendence focusing on the concept of mediation

**Divine Imperfection** L. Appel Jr., 2022-02-25 The root of human dilemmas although they always present themselves in multiple hues invariably plunges into the question of human dualism consciousness and matter There's a subtle cosmic Darwinism going on that we haven't paid attention to yet A real universal filter is at work silently decimating intelligent biological species across the Universe From our animal matrix either this subtle something that we decide to identify as consciousness will emerge or our bodily instincts will inevitably lead us to nuclear suicide The Fermi paradox suggests this possibility explicitly The human mind this highly efficient and complex biological software emerged from this same Darwinian process of violent and brutal struggle for survival So the mind also naturally tends to aggression and violence when dissociated from consciousness that energy that many decided to call pejoratively as the ghost in the machine The human world in general expresses precisely such reality created by the mind when dissociated from consciousness Hence our inclination towards indifference and aggression Our animal instincts are still highly active determining our every move So the nuclear age effectively corresponds to the turning point of intelligent species Every day we seem to take a step forward towards defcon 1 the threat of imminent nuclear destruction The existence of the doomsday clock is known only to a few Atomic weapons are not peace insurers by the certainty of mutual assured destruction M A D This is a truly insane perspective that exposes us in our ravings making it more than clear that we have deviated from our natural evolutionary course However if we implode ourselves it will only show that we never had what it takes to persevere as a conscious biological species The Universe however will lose nothing It is its simple and natural way of functioning The Parable of the Sower reminds us of this reality
