*Julian Onderdonk in New York* James Graham Baker, 2014-04-25 Famed for his bluebonnet landscapes San Antonio native Julian Onderdonk may be the most well known artist Texas has ever produced Onderdonk spent several years outside the state though seeking to make a name for himself in New York City He spent much of his time in New York as the very definition of a starving artist In *Julian Onderdonk The Lost Years the Lost Paintings* James Graham Baker explores the artist's New York years so often neglected by previous scholars Through painstaking research Baker reveals that Onderdonk painted hundreds of images under pseudonyms during his time in New York These images not only reveal the means by which the artist struggled to make ends meet but add another dimension to our understanding of the artist's oeuvre It is not possible to appreciate and understand Julian Onderdonk and his art without including these works Largely composed of landscapes and marine scenes depicting the vanishing rural areas and shorelines around New York City they show that Onderdonk was more than simply a bluebonnet painter      The Collection of First Editions of American Authors Formed by the Late Arthur Swann

Arthur Swann, 1953      **From Sign to Text** Yishai Tobin, 1989-01-01 This volume contains selected contributions from the colloquium *From Sign to Text* Ben Gurion University 1985 and combines the diverse interdisciplinary interests and approaches of the contributors in a fundamentally shared definition of language seen as a flexible and open ended system of systems revolving around the notion of signs used by human beings to communicate The special interrelationship between signs and texts is discussed both theoretically and methodologically The collection consists of an English and a French section      Seascape Ecology Simon J. Pittman, 2017-12-18 *Seascape Ecology* provides a comprehensive look at the state of the science in the application of landscape ecology to the seas and provides guidance for future research priorities The first book devoted exclusively to this rapidly emerging and increasingly important discipline it is comprised of contributions from researchers at the forefront of seascape ecology working around the world It presents the principles concepts methodology and techniques informing seascape ecology and reports on the latest developments in the application of the approach to marine ecology and management A growing number of marine scientists geographers and marine managers are asking questions about the marine environment that are best addressed with a landscape ecology perspective *Seascape Ecology* represents the first serious effort to fill the gap in the literature on the subject Key topics and features of interest include The origins and history of seascape ecology and various approaches to spatial patterning in the sea The links between seascape patterns and ecological processes with special attention paid to the roles played by seagrasses and salt marshes and animal movements through seascapes Human influences on seascape ecology includes models for assessing human seascape interactions A special epilogue in which three eminent scientists who have been instrumental in shaping the course of landscape ecology offer their insights and perspectives *Seascape Ecology* is a must read for researchers and professionals in

an array of disciplines including marine biology environmental science geosciences marine and coastal management and environmental protection It is also an excellent supplementary text for university courses in those fields

*The Transfigured Kingdom* Ernest A. Zitser, 2018-09-05 In this richly comparative analysis of late Muscovite and early Imperial court culture Ernest A Zitser provides a corrective to the secular bias of the scholarly literature about the reforms of Peter the Great Zitser demonstrates that the tsar s supposedly secularizing reforms rested on a fundamentally religious conception of his personal political mission In particular Zitser shows that the carnivalesque and often obscene activities of the so called Most Comical All Drunken Council served as a type of Baroque political sacrament a monarchical rite of power that elevated the tsar s person above normal men guaranteed his prerogative over church affairs and bound the participants into a community of believers in his God given authority charisma The author suggests that by implicating Peter s royal priesthood in taboo breaking libertine ceremonies the organizers of such sacred parodies inducted select members of the Russian political elite into a new system of distinctions between nobility and baseness sacrality and profanity tradition and modernity Tracing the ways in which the tsar and his courtiers appropriated aspects of Muscovite and European traditions to suit their needs and aspirations *The Transfigured Kingdom* offers one of the first discussions of the gendered nature of political power at the court of Russia s self proclaimed Father of the Fatherland and reveals the role of symbolism myth and ritual in shaping political order in early modern Europe

**The Tourism Imaginary and Pilgrimages to the Edges of the World** Nieves Herrero, Sharon R. Roseman, 2015-06-01 This book examines how the growth of tourism in locations that have historically been considered geographically remote plays a major role in the consolidation and transformation of often longstanding and powerful cultural imaginaries about the edges of the world The contributors examine the attraction of the sublime remoteness continental border points and the dangers of the sea in Finisterre or Fisterra in Galicia Spain Finist re in Brittany France Land s End Cornwall England Lough Derg Ireland Nordkapp or North Cape Norway Cape Spear Newfoundland Canada and Tierra del Fuego Argentina While those travelling to these locations can be seen to be conducting some form of religious or secular pilgrimage those who live in them have long contended with the implications of economic and political marginalization within global political economies

**Time-Series Observations of Ocean Acidification: a Key Tool for Documenting Impacts on a Changing Planet** Abed El Rahman Hassoun, Adrienne J. Sutton, Sam Dupont, Jose Martin Hernandez-Ayon, Xianghui Guo, 2025-04-15 Ocean acidification is a global phenomenon with local effects Marine ecosystems are facing multiple stressors leading to significant changes Time series observations are the basis to understand these changes and distinguishing between natural and anthropogenic variability of physical chemical and biological components of marine environments Moreover field monitoring is often neglected as a tool to document the

responses of marine organisms and key habitats to ocean acidification Time series observations of ocean acidification are thus critical to understanding the current threats that the ocean s ecosystems are witnessing and efficiently developing and implementing adaptation and mitigation solutions Time series dedicated to observing ocean acidification other stressors as well as biological parameters are the baseline for long term assessment of the ocean s health and for evaluating the efficiency of local and global actions toward achieving climate targets Therefore the goal of this Research Topic is to highlight the latest research efforts conducted to document ocean acidification patterns and trends and their consequences on marine life In this issue we will focus on new and old time series stations efforts to bridge physical chemical and biological observations and their application for modeling and future projections [Catalog of Copyright Entries](#) Library of Congress. a wealth of children's books from Canada Denmark Germany Italy Norway Russia the United Kingdom and the USA The theoretical and methodological approaches range from literary studies developmental psychology maps and geography literacy ecocriticism historical contextualization with both new historicist and political historical leanings and intermediality to materialist cartographies cultural studies island studies and genre studies By this this volume aims at embedding children's literature in a broader field of literary and cultural studies thus situating children's literature research within a general context of literary theory
