A Voyage of Discovery, Into the South Sea and Beering's Straits, for the Purpose of Exploring a North-east Passage,

Undertaken in the Years 1815-1818, at the Expense of His Highness the Chancellor of the Empire, Count Romanzoff, in the Ship Rurick Otto von Kotzebue, 1821 **Religion and Society in Roman Palestine** Douglas R.

Edwards, 2004-08-05 A collection of papers focussing on the contributions made by archaeology to the understanding of society in Palestine in the Roman period The papers enable the two ways of evidence to interact in an unprecedented way

Since the Time of the Transformers Alan D. McMillan, 2000-02-01 This book examines over 4000 years of culture history of the related Nuuchah-nulth, Ditidaht and Makah peoples on western Vancouver Island and the Olympic Peninsula Using data from the Toquaht Archaeological Project McMillan challenges current ethnographic interpretations that show little or no change in these peoples' culture Instead by combining historical evidence, recent archaeological data and oral traditions he demonstrates conclusively that there were in fact extensive cultural changes and restructuring in these societies in the century following contact with Europeans

"Destined to Fail" Julia Eklund Koza, 2021-08-31 A little known fact about the prominent US psychologist and educator Carl E. Seashore (1866-1949) is that he was deeply involved in the American eugenics movement He was among the US academics to support eugenics long before German Nazis embraced it A titan in a host of disciplines and a proponent of radical education reform Seashore used his positional power to promote a constellation of education reforms consistent with central precepts of eugenics Many of these reforms including tracking gifted and talented programs and high stakes standardized testing were adopted and remain standard practice in the United States today He promulgated the idea that musical talent is biologically inheritable and he developed the first standardized tests of musical talent these tests were used by early twentieth century researchers in their attempts to determine whether there are race differences in musical talent Seashore's ideas and work profoundly shaped music education's research trajectory as well as enduring commonsense beliefs about musical ability An intersectional analysis *Destined to Fail* focuses on the relationship between eugenics and Seashore's views on ability, race and gender Koza concludes that Seashore promoted eugenics and its companion eugenics because he was a true believer She also discusses the longstanding silences surrounding Seashore's participation in eugenics As a diagnosis and critique of the present *Destined to Fail* identifies resemblances and connections between past and present that illustrate the continuing influence of eugenics and the systems of reasoning that made early twentieth century eugenics imaginable and seem reasonable on education discourse and practice today It maps out discursive, citational and funding connections between eugenicists of the early twentieth century and contemporary White supremacists this mapping leads to some of Donald Trump's supporters and appointees

[A Book of Discovery](#) Margaret Synge, 2024-11-24 A BOOK OF DISCOVERY The History of the World's Exploration From the Earliest Times to the Finding of the South Pole A LITTLE OLD WORLD No story is complete unless it begins at the very beginning But where is the beginning Where is the dawn of geography the knowledge of our earth What was it like before the first explorers made their way into distant lands Every day that passes we are gaining fresh knowledge of the dim and silent past Every day

men are patiently digging in the old heaps that were once the sites of busy cities and as a result of their unwearying toil they are revealing to us the life stories of those who dwelt therein they are disclosing secrets writ on weather worn stones and tablets bricks and cylinders never before even guessed at Thus we read the wondrous story of ancient days and breathlessly wonder what marvellous discovery will thrill us next For the earliest account of the old world a world made up apparently of a little land and a little water we turn to an old papyrus the oldest in existence which tells us in familiar words unsurpassed for their exquisite poetry and wondrous simplicity of that great dateless time so full of mystery and awe In the beginning God created the heaven and the earth And the earth was waste and void and darkness was upon the face of the deep and the spirit of God moved upon the face of the waters And God said Let there be a firmament in the midst of the waters and let it divide the waters from the waters And God divided the waters which were under the firmament from the waters which were above the firmament And God said Let the waters under the heaven be gathered into one place and let the dry land appear And God called the dry land Earth and the gathering together of the waters called he Seas Thus beautifully did the children of men express their earliest idea of the world s distribution of land and water
