Elgin,1988-01-01 The authors argue against certain philosophical distinctions between art and science between verbal and nonverbal meaning and between the affective and the cognitive The book continues Goodman s argument against one traditional mode of philosophizing which privileges the notions of truth and knowledge Hence the book is in a broadly pragmatic tradition It also deals in detail with such topics as meaning in architecture and the concept of variation in art and contains a superb critique of some important views in contemporary epistemology This work will be savored even by those who will not accept all aspects of Goodman and Elgin s approach Essential for all undergraduate philosophy collections Stanley Bates Choice
