## Season Of The Hyaena:

Larger Carnivores of the African Savannas Jacobus du P. Bothma, Clive Walker, 2013-11-11 The African savannas are rich in wildlife Yet they are also increasingly threatened by expanding human populations The interrelationship between vast prey herds and their predator offers fascinating insights into the world of African wildlife Moreover the larger carnivores are sensitive measures of environmental quality and serve as early warning systems to environmental degradation The book presents the ecology of all African carnivores that are larger than jackals in an ordered and scientific way It is augmented by many colour photographs taken by both authors and excellent sketches by the internationally renowned wildlife artist Clive Walker depicting the life and habitat of these carnivores *Mammals of the Soviet Union, Volume 2 Part 2* V.G.

Heptner, A.A. Sludskii, 2023-09-25 **Dental Cementum in Anthropology** Stephan Naji, William Rendu, Lionel Gourichon, 2022-02-10 Presents the latest advances in cementschronology and its use in various anthropological contexts from ancient fossils to forensic cases *Mammals of the Soviet Union, Volume 2 Part 2 Carnivora (Hyenas and Cats)* V. G.

Heptner, 1989 **Social Organization of the Brown Hyena (*Hyaena Brunnea*) of the Central Kalahari Desert** Cordelia Dykes Owens, 1993 **The Kingdon Field Guide to African Mammals** Jonathan Kingdon, 2015-04-23 Jonathan Kingdon one of the world's foremost authorities on African mammals has both written and illustrated this landmark field guide The unique combination of his extensive field experience and artistic talent has produced a stunning work that sets new standards The concise text provides full information on identification distribution ecology relationships and conservation status with introductory profiles that summarise the characteristics of each mammal group All known species of African land mammal are covered with coverage of several of the more complex groups of small mammals simplified by reference to genera Classification has been fully updated and this new edition includes many newly recognised species With over 780 colour illustrations numerous line drawings and more than 520 maps this book will be an essential companion to anyone visiting Africa or with an interest in the mammals of the continent Competition note There are regional mammal books covering southern Africa for example but none that covers the whole continent in a portable format The smaller format and more concise Kingdon Pocket Guide to African Mammals may be more appealing to a more general safari market but is much less comprehensive and more out of date **Walker's Carnivores of the World** Ronald M. Nowak, 2005 Although they are

highly intelligent ruthless predators carnivores are increasingly rare From the dwarf mongoose to the polar bear carnivores are at once respected and misunderstood invoking both fear and curiosity in the humans with whom they share their world Ronald M Nowak celebrates these fascinating mammals in Walker's Carnivores of the World This comprehensive guide featuring 225 illustrations covers the world's eight terrestrial families of carnivores Each generic account comprises scientific and common names number and distribution of species physical attributes measurements hunting and social activity reproduction habitat population dynamics longevity and status of threatened species A thought provoking overview

by David W Macdonald and Roland W Kays is packed with results of the latest field and laboratory research on topics ranging from evolutionary history to the adaptive value of fur patterns Emphasizing the interplay of social life morphology and predatory behavior it provides an up to date panorama of the world s carnivores      **Advances in Imaging Technology Research and Application: 2012 Edition** ,2012-12-26 Advances in Imaging Technology Research and Application 2012 Edition is a ScholarlyEditions eBook that delivers timely authoritative and comprehensive information about Imaging Technology The editors have built Advances in Imaging Technology Research and Application 2012 Edition on the vast information databases of ScholarlyNews You can expect the information about Imaging Technology in this eBook to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Advances in Imaging Technology Research and Application 2012 Edition has been produced by the world s leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com>      **A Field Guide to the Larger Mammals of Africa** Jean Dorst,1970 Practical recognition manual for nonspecialists with interest for traveling or stay at home wildlife enthusiasts      **Serengeti IV** Anthony R. E. Sinclair,Kristine L. Metzger,Simon A. R. Mduma,John M. Fryxell,2015-05-11 The vast savannas and great migrations of the Serengeti conjure impressions of a harmonious and balanced ecosystem But in reality the history of the Serengeti is rife with battles between human and non human nature In the 1890s and several times since the cattle virus rinderpest at last vanquished in 2008 devastated both domesticated and wild ungulate populations as well as the lives of humans and other animals who depended on them In the 1920s tourists armed with the world s most expensive hunting gear filled the grasslands And in recent years violence in Tanzania has threatened one of the most successful long term ecological research centers in history Serengeti IV the latest installment in a long standing series on the region s ecology and biodiversity explores the role of our species as a source of both discord and balance in Serengeti ecosystem dynamics Through chapters charting the complexities of infectious disease transmission across populations agricultural expansion and the many challenges of managing this ecosystem today this book shows how the people and landscapes surrounding crucial protected areas like Serengeti National Park can and must contribute to Serengeti conservation In order to succeed conservation efforts must also focus on the welfare of indigenous peoples allowing them both to sustain their agricultural practices and to benefit from the natural resources provided by protected areas an undertaking that will require the strengthening of government and education systems and as such will present one of the greatest conservation challenges of the next century      Riverine Ecology Volume 2 Susanta Kumar Chakraborty,2021-02-27 This book is part of a two volume set that offers an innovative approach towards developing methods and tools for assigning conservation categories of threatened taxa and their conservation strategies by way of

different phases of eco restoration in the context of freshwater river systems of tropical bio geographic zones The set provides a considerable volume of research on the biodiversity component of river ecosystems seasonal dynamics of physical chemical parameters geo hydrological properties types sources and modes of action of different types of pollution river restoration strategies and methodologies for the ongoing ecological changes of river ecosystems Volume 2 highlights biodiversity potential in aiding the resistance and resilience of riverine ecosystem functioning and their synergistic effects on ongoing environmental perturbations Comprehensive information on the conservation of river associated wildlife is provided covering the impacts of pollution land use changes river policies and ecosystem restoration strategies The book offers an innovative approach towards developing methods and tools for assigning conservation categories of threatened taxa and covers their conservation strategies by way of different phases of eco restoration in the context of freshwater river systems of tropical bio geographic zones

**Asdell's Patterns of Mammalian Reproduction** Virginia Douglass Hayssen, Ari Van Tienhoven, Ans Van Tienhoven, 1993 Since the appearance of the second edition of Sydney A Asdell's widely used Patterns of Mammalian Reproduction in 1964 the field of reproductive physiology has expanded dramatically Accordingly this revision adopts a different structure from previous editions substituting empirical delineations for physiological interpretations With the emphases now on a presentation of the published facts of mammalian reproduction it provides a thorough compilation of what is known about the basic reproductive biology of each of the 4300 mammalian species To gather information the authors examined more than 20 000 publications dating up to 1992 They used primary sources as much as possible supplementing them with English translations of Russian Finnish Chinese and Japanese journals The data are presented in taxonomic order Each familial account summarizes the pattern of reproduction for the family and provides lists of citations arranged by topic of the literature on the endocrinology reproductive anatomy and reproductive physiology of the family Following each account is a tabular listing of species specific data for neonatal mass and size weaning mass and size litter size age at sexual maturity estrous cycle length gestation length lactation length number of litters per year and seasonality of reproduction For each of these reproductive variables the range of data gleaned from the literature is given together with the source of each value listed Virginia Hayssen is Assistant Professor of Biology at Smith College Ari Van Tienhoven is Professor of Animal Physiology Emeritus at Cornell University Ans Van Tienhoven assisted in the compilation of data for the book
