

Gardening SCHEDULE

January/February

Shop for: seeds, supplies, tools.

March

Start indoors: onions parsley,
lettuce, peppers, eggplant.

April

Start tomatoes indoors.

Plant strawberries.

Transplant onions & lettuce.

May

Weather permitting, plant:
beans, corn, squash.

Transplant tomatoes & peppers.

June

Plant carrots, turnips & radishes.
Set up trellises & cages.

July

Plant spinach.

Pull onions.

August

Last planting of lettuce & radishes.

Plant cover crops.

September

Harvest sweet potatoes.

Be on the lookout for first frost.

October

Plant garlic.

Harvest the last of the potatoes.

Harvest winter squash.

November

Mulch carrots that will be left
in the ground.

Mulch garlic after the ground freezes.

Freezing Vegetables:

Some vegetables that freeze well: carrots, peas, onions, potatoes, corn, squash, peppers, green beans, spinach, tomatoes.
Firm vegetables, like potatoes, should be blanched first. Drop them into boiling water for 3 minutes, immediately drop into ice water for 3 minutes. Dry with a towel, cut them up and freeze.

Seasonal Tasks For The Australian Garden

Peter Cundall

Seasonal Tasks For The Australian Garden:

Gardens for All Seasons Mary Horsfall, 2012 *Gardens for All Seasons* is a gardening lifestyle book by bestselling author Mary Horsfall celebrating the role of gardens in our lives and advising on the timing of jobs in the gardening year throughout Australia. Monthly chapters include topics such as planning bushfire preparation, watering, pot plant care, mulching, weeding, fertilising, pruning, propagating, pest control, what to plant for different climate zones, and what garden venues and events to visit. Mary details her own gardening year including jobs done, fruits and vegetables harvested, food cooked based on the harvest, what was in flower, and wildlife observations all on a month by month basis. Each chapter includes a special topic of the month such as fun for kids in the garden, biodiversity, manipulating microclimate and fragrance, and first aid. **The Practical Australian Gardener** Peter Cundall, 1989 *The Practical Australian Gardener* Peter Cundall, 2003 *Exposing Lifestyle Television* Gareth Palmer, 2016-04-15 In the last decade, lifestyle television has become one of the most dominant television genres, with certain shows now global brands with formats exploited by producers all over the world. What unites these programmes is their belief that the human subject has a flexible, malleable identity that can be changed within television-friendly frameworks. In contrast to the talk shows of the eighties and nineties where modest transformation was discussed as an ideal, advances in technology combined with changing tastes and demands of viewers have created an appetite for dramatic transformations. This volume presents case studies from across the lifestyle genre, considering a variety of themes but with a shared understanding of the self as an evolving project driven by enterprise. Written by an international team of scholars, the collection will appeal to sociologists of culture and consumption as well as to scholars of media studies and media production throughout the world. **Community Gardening as Social Action** Claire Nettle, 2016-05-23 There has been a resurgence of community gardening over the past decade, with a wide range of actors seeking to get involved, from health agencies aiming to increase fruit and vegetable consumption to radical social movements searching for symbols of non-capitalist ways of relating and occupying space. Community gardens have become a focal point for local activism in which people are working to contribute to food security, question the erosion of public space, conserve and improve urban environments, develop technologies of sustainable food production, foster community engagement, and create neighbourhood solidarity. Drawing on in-depth case studies and social movement theory, Claire Nettle provides a new empirical and theoretical understanding of community gardening as a site of collective social action. This provides not only a more nuanced and complete understanding of community gardening but also highlights its potential challenges to notions of activism, community democracy, and culture. *Australian Garden and Field*, 1921 **The Australian Garden Lover**, 1929 **The Practical Australian Gardener**, 1997 This is the complete garden guide, whether you're planting vegetables, ornamentals, house plants, home orchards, or landscaping a larger area. It tells you how to have a pest-free garden without using dangerous chemicals and includes advice on keeping larger pests such as dogs, cats, and possums out of your yard. **Cacti and**

Succulents Handbook, Expanded 2nd Edition Gideon F Smith, 2022-03-28 Learn everything there is to know about cacti and succulent care in this newly updated easy to use volume Jam packed with insight on more than 300 types of succulents and cacti each plant profile contains gorgeous photography botanical and common names must know advice and more Also included are simple instructions on choosing the right plants and helping them thrive plus tips on how to propagate succulents and cacti repotting grooming and pest control This updated edition features all new photography updates to scientific names of original plants based on current standards 70 new cacti species and 100 new succulent species Author and award winning researcher Gideon F Smith previously served as president for the International Organization of Succulent Plant Study and has published over 500 scientific and popular papers on the taxonomy biology and evolution of succulent plants

Sustainable Gardens Rob Cross, Roger Spencer, 2009-01-29 The third title in the CSIRO Gardening Guide series Sustainable Gardens by Roger Spencer and Rob Cross shows how horticulture can contribute towards a more sustainable future Written for home gardeners professional horticulturists landscapers and all those passionate about cultivated landscapes this book examines the steps we can take towards harmonising gardening activity with the cycles of nature Two outstanding botanists from the Royal Botanical Gardens in Melbourne Roger and Rob have produced a genuine gardening bible for our times They show how every gardener both professional and amateur can contribute positively to environmental stewardship Gardens may be consumers of resources but the negative effects of this consumption can be minimised and can be offset by some of the positive contributions gardens make Roger and Rob explain the connections between human activity resource depletion and environmental degradation They show how to conduct an audit of gardening practices materials and results so that every gardener can measure the impact he or she is having on nature They show how to minimise the impacts on nature of our consumption of water materials and energy in the garden how to make gardens more environmentally friendly through design construction and maintenance phases the importance of biodiversity and how horticulture can help protect natural systems and the role that gardening can play in alleviating the environmental impacts of food production Checklists are provided so that gardeners can ensure they are taking the most sustainable path through each phase of gardening design construction maintenance The book ends with a guide round an existing garden that combines physical beauty with sustainability and discusses future trends for sustainable horticulture In an increasingly urbanised world parks and gardens are our main point of contact with nature If we can maximise the environmental benefits of our gardens public spaces and landscapes we will make a huge contribution to sustainable living This book is the first to show us how

The Garden of Ideas Richard Aitken, 2010 The Garden of Ideas tells an inspiring and engaging story of Australian garden design From the imaginings of emigrant garden makers of the late eighteenth century to the concerns of twenty first century gardeners this book charts its way across four centuries through a handsome and satisfying fusion of images and text The Garden of Ideas is embellished with an unparalleled array of images paintings drawings prints plans and photographs each

richly evocative of their time and most never previously published Unearthed from around Australia and many from overseas these images carry the story of Australian garden style down the years in the process criss crossing social and cultural history across the wide extremes of our continent Richard Aitken whose book Botanical Riches was published in 2006 to popular and critical acclaim brings a lifetime of experience to The Garden of Ideas He achieves fresh insights and presents our passion for garden making with wit and flair The Garden of Ideas is a valuable source book for the sophisticated gardener and an indispensable companion for the garden lover

The Flower Garden in Australia Mrs. Rolf Boldrewood, Rose Boldrewood, 1893

Australian Agriculture Ted Henzell, 2007-05-09 Agriculture in Australia has had a lively history The first European settlers in 1788 brought agricultural technologies with them from their homelands influencing early practices in Australia Wool production dominated the 19th century while dairying grew rapidly during the first half of the 20th century Despite having one of the driest landscapes in the world Australia has been successful in adapting agricultural practices to the land and these innovations in farming are explained in this well researched volume Focusing on the technologies that the farmers and graziers actually used this book follows the history of each of the major commodities or groups of commodities to the end of the 20th century grain crops sheep and wool beef and dairy working bullocks and horses sugar cotton fruit and vegetables and grapes and wine Major issues facing the various agricultural enterprises as they enter the 21st century are also discussed Written in a readable style to suit students of history social sciences and agriculture Australian Agriculture will also appeal to professionals in the industry and those with a general interest in Australian sociology and history

Nature, Temporality and Environmental Management Lesley Head, Katarina Saltzman, Gunhild Setten, Marie Stenseke, 2016-08-05 How are different concepts of nature and time embedded into human practices of landscape and environmental management And how can temporalities that entwine past present and future help us deal with challenges on the ground In a time of uncertainty and climate change how much can we hold onto ideals of nature rooted in a pristine and stable past The Scandinavian and Australian perspectives in this book throw fresh light on these questions and explore new possibilities and challenges in uncertain and changing landscapes of the future This book presents examples from farmers gardens and Indigenous communities among others and shows that many people and communities are already actively engaging with environmental change and uncertainty The book is structured around four themes environmental futures mobile natures indigenous and colonial legacies heritage and management Part I includes important contributions towards contemporary environmental management debates yet the chapters in this section also show how the legacy of older landscapes forms part of the active production of future ones Part II examines the challenges of living with mobile natures as it is acknowledged that environments natures and people do not stand still An important dimension of the heritage and contemporary politics of Australia Sweden and Norway is the presence of indigenous peoples As is clear in part III the legacies of the colonial past both haunt and energise contemporary land

management decisions Finally part IV demonstrates how the history and heritage of landscapes including human activities in those landscapes are entwined with contemporary environmental management The rich empirical content of the chapters exposes the diversity of meanings practices and ways of being in nature that can be derived from cultural environmental research in different disciplines The everyday engagements between people nature and temporalities provide important creative resources with which to meet future challenges

Sprinter and Sprummer Timothy Entwisle, 2014-09-01 Sprinter and Sprummer challenges the traditional four seasons and encourages us to think about how we view changes in our natural world Since 1788 Australia has carried the yoke of four European seasons that make no sense in most parts of the country We may like them for historical or cultural reasons or because they are the same throughout the world but they tell us nothing of our natural environment It s time to reject those seasons and to adopt a system that brings us more in tune with our plants and animals a system that helps us to notice and respond to climate change Using examples from his 25 years working in botanic gardens author Timothy Entwisle illustrates how our natural world really responds to seasonal changes in temperature rainfall and daylight and why it would be better to divide up the year based on what Australian plants do rather than ancient rites of the Northern Hemisphere Sprinter and Sprummer opens with the origins and theory of the traditional seasonal system and goes on to review the Aboriginal seasonal classifications used across Australia Entwisle then proposes a new five season approach explaining the characteristics of each season along with the biological changes that define them The book uses seasons to describe the fascinating triggers in the life of a plant and plant like creatures using charismatic flora such as carnivorous plants the Wollemi Pine and orchids as well as often overlooked organisms such as fungi The final chapter considers climate change and how the seasons are shifting whether we like it or not

Botanica's Organic Gardening Botanica Editors, 2002 The newest edition to the Botanica s Gardening series this authoritative encyclopedia covers all aspects of organic gardening Botanica s Organic Gardening is a richly textured stylish visually stunning and comprehensive guide to chemical free gardening and living in harmony with the earth Included is a series of four comprehensive easy to use guides to growing vegetables herbs fruits and ornamental flowering plants

The New Ornamental Garden Simon Rickard, 2011 Shows how heat cold water availability rainfall patterns length of growing season evaporation rate and humidity influence plant growth in Australia from the wet sub tropics to the temperate climate of southern Australia

Gardening For Dummies Shirley Stackhouse, Jennifer Stackhouse, 2013-03-29 Brimming with advice resources and suggested planting choices this friendly guide shows you step by step how to create the garden of your dreams From basic cultivation to garden design this book is just what you need to start playing in the dirt even if you ve never picked up a garden trowel in your life
