Fuller,Gilbert Proulx,2006-02-28 Martens and Fishers Martes in Human Altered Environments An International Perspective examines the conditions where humans and martens are compatible and incompatible and promotes land use practices that allow Martes to be representatively distributed and viable All Martes have been documented to use forested habitats and 6 species excluding the stone marten are generally considered to require complex mid to late successional forests throughout much of their geographic ranges All species in the genus require complex horizontal and vertical structure to provide escape cover protection from predators habitat for their prey access to food resources and protection from the elements Martens and the fisher have high metabolic rates have large spatial requirements have high surface area to volume ratios for animals that often inhabit high latitudes and often require among the largest home range areas per unit body weight of any group of mammals Resulting from these unique life history characteristics this genus is particularly sensitive to human influences on their habitats including habitat loss stand scale simplification of forest structure via some forms of logging and landscape scale effects of habitat fragmentation Given their strong associations with structural complexity in forests martens and the

fisher are often considered as useful barometers of forest health and have been used as ecological indicators flagship and umbrella species in different parts of the world Thus efforts to successfully conserve and manage martens and fishers are associated with the ecological fates of other forest dependent species and can greatly influence ecosystem integrity within forests that are increasingly shared among wildlife and humans We have made great strides in our fundamental understanding of how animals with these unique life history traits perceive and utilize habitats respond to habitat change and how their populations function and perform under different forms of human management and mismanagement This knowledge enhances our basic understanding of all species of Martes and will help us to achieve the goal of conserving viable populations and representative distributions of the world s Martes their habitats and associated ecological communities in our new millennium

Tourism, Mobility and Second Homes C. Michael Hall, Dieter K. Müller, 2004-07-27

Second homes the cottage the summer house the bach are an important part of the tourism and leisure lifestyles of many people in the developed world Second homes are therefore an integral component of tourism experiences in rural and peripheral areas Yet despite their significance not only for tourism but also for rural communities and the rural economy relatively little research has been undertaken on the topic until recent times This volume represents the first major international analysis and review of second homes for over 25 years It will provide a significant resource for those interested in changing patterns of tourism and leisure behaviour as well as the use of the countryside and peripheral areas The book describes the economic social and environmental impacts of second homes as well as their planning implications and places such discussions within the context of contemporary human mobility The volume represents essential reading for those interested in rural regional development processes and the development of new rural leisure landscapes

Making Money on Your Vacation Rental Home Howard Jones, 2010-08-17

A new book just hitting the marketplace will be a welcome guide to many cash strapped owners of vacation and second homes in this difficult real estate environment Making Money on Your Vacation Rental Home is the title of this detailed how to book recently published by Howard Jones a CPA and licensed real estate broker who has owned and managed his own vacation rental homes Subtitled An Essential Handbook for Managing Your Short Term Vacation and Resort Rental Property for Maximum Enjoyment and Profit this comprehensive 400 page handbook includes a chapter by chapter guide for rental home owners who wish to take advantage of the new opportunity that has emerged in recent years to self manage their rental homes by using commercial rental web sites Besides covering owner rental management specifics are provided on related topics such as maintaining the necessary computer resources and the tax

implications for buying selling and owning vacation homes The Routledge Handbook of Second Home Tourism and Mobilities C. Michael Hall, Dieter Müller, 2018-04-17 Second homes have become an increasingly important component of both tourism and housing studies They can directly and indirectly contribute a significant number of domestic and international visitors to destinations and may be part of longer term retirement lifestyle and amenity migration that can have significant economic and social effects on communities and destination development This volume offers an overview of different disciplinary and methodological approaches to second homes while simultaneously providing a broad geographical reach Divided into four parts exploring governance development community and mobile second homes the book provides a contemporary account of the major issues in an area of growing international interest This timely handbook covers a wide range of dimensions from planning to the role of second homes in development and the management of their impact The international and cross disciplinary nature of the contributions will be of interest to numerous academic fields in the social sciences as well as urban and regional planners **Final Environmental Impact Statement for the River Management Plan** , 1984 **The Domestic Dog** James Serpell, 1995 A scientific analysis of dogs their behaviour and their relationships with humans *Lake States Regional Forest Resources Assessment* , 1997 Rural Housing, Exurbanization, and Amenity-Driven Development Mark Lapping, 2016-04-15 Rural America is progressing through a dramatic and sustained post industrial economic transition For many traditional means of household sustenance gained through agriculture mining and rustic tourism are giving way to large scale corporate agriculture footloose and globally competitive manufacturing firms and mass tourism on an unprecedented scale These changes have brought about an increased presence of affluent amenity migrants and returnees as well as growing reliance on low wage seasonal jobs to sustain rural household incomes This book argues that the character of rural housing reflects this transition and examines this using contemporary concepts of exurbanization rural amenity based development and comparative distributional descriptions of the haves and the have nots Despite rapid in migration and dramatic changes in land use there remains a strong tendency for communities in rural America to maintain the idyllic small town myth of large lot single family home ownership This neglects to take into account the growing need for affordable housing both owner occupied and rental properties for local residents and seasonal workers This book suggests that greater emphasis be placed in rural housing policies that account for this rapid social and economic change and the need for affordable rural housing alternatives
