wood chemistry and bio based composites The book analyzes the chemical composition and physical properties of wood
cellulose and its response to natural processes of degradation It describes safe and effective chemical modifications to
strengthen wood against biological chemical and mechanical degradation without using toxic leachable or corrosive
chemicals Expert researchers provide insightful analyses of the types of chemical modifications applied to polymer cell walls
in wood emphasizing the mechanisms of reaction involved and resulting changes in performance properties These include
modifications that increase water repellency fire retardancy and resistance to ultraviolet light heat moisture mold and other
biological organisms The text also explores modifications that increase mechanical strength such as lumen fill monomer
polymer penetration and plasticization The Handbook of Wood Chemistry and Wood Composites concludes with the latest
applications such as adhesives geotextiles and sorbents and future trends in the use of wood based composites in terms of
sustainable agriculture biodegradability and recycling and economics Incorporating over 30 years of teaching experience the
