1950s Britain's Bewick's have been the subject of intensive behavioural study while their population ecology has provided a similar focus for research. In *Bewick's Swan* Eileen Rees tells the story of these birds in rich detail. Rees discusses their biology in full with sections on population and distribution, breeding biology, wintering behaviour, food and feeding ecology, taxonomy and phylogeny, migration and conservation. Much original research is included and there is frequent reference to the Bewick's sibling subspecies, the Tundra Swan of North America. Personal recollections from a lifetime of study weave through the narrative which is illuminated by Dafila Scott's evocative illustrations.
