Reading Beyond the Code Terence Cave, Deirdre Wilson, 2018-05-10 This book explores the value for literary studies of the model of communication known as relevance theory Drawing on a wide range of examples lyric poems by Yeats Herrick Heaney Dickinson and Mary Oliver novels by Cervantes Flaubert Mark Twain and Edith Wharton nine of the ten essays are written by literary specialists and use relevance theory both as a broad framing perspective and as a resource for detailed analysis The final essay by Deirdre Wilson co founder with Dan Sperber of relevance theory takes a retrospective view of the issues addressed by the volume and considers the implications of literary studies for cognitive approaches to communication Relevance theory described by Alastair Fowler as nothing less than the makings of a radically new theory of communication the first since Aristotle s offers a comprehensive pragmatics of language and communication grounded in evidence about the ways humans think and behave While designed to capture the everyday murmur of conversation gossip peace making hate speech love speech body language and the chatter of the internet it covers the whole spectrum of human modes of communication including literature in the broadest sense as a characteristically human activity Reading Beyond the Code is unique in using relevance theory as a prime resource for literary study and it is also the first to claim that the model works best for literature when understood in the light of a broader cognitive approach focusing on a range of phenomena that support an embodied conception of cognition and language This broadened perspective serves to enhance the value for literary studies of the central claim of relevance theory that the code model is fundamentally inadequate to account for human communication and in particular for the modes of communication that are proper to literature **Collected Poems**

Douglas W Tallamy author of *The Nature of Oaks* and *Nature's Best Hope*. They pollinate our flowers and vegetable crops and they keep pests in check. In *Garden Allies* Frederique Lavoipierre shares fascinating portraits of these creatures, describing their life cycles and showing how they keep the garden's ecology in balance. Also included is helpful information on how to nurture and welcome these valuable creatures into your garden. With beautiful pen and ink drawings by Craig Latker, *Garden Allies* invites you to make friends with the creatures that fill your garden; the reward is a renewed sense of nature's beauty and a garden humming with life.

**Fenland Nature** Duncan Poyser, Simon Stirrup, 2025-05-06 This book showcases the natural history and landscape of the Fens, an area now responsible for a third of Britain's food production and worth over 3 billion to the economy every year. It describes the geology and geography across the Fenland Basin over the last 14,000 years, a period dominated by the flux of wetlands and movement of water. The human relationship with this landscape is traced through history from Mesolithic hunters to the prosperity of a medieval economy based on the currency of eels, through the taming and draining of the vast wetlands to modern farming on an industrial scale. While recognising that only a fraction of the Fens is left, *Fenland Nature* celebrates the breadth of wildlife still to be found in the region, from vast flocks of visiting wildfowl in the winter months to rare and specialised plants and insects, all illustrated with detailed and evocative photographs. The book concludes by contemplating an uncertain future where there are possibilities for a sustainable agricultural industry alongside increasing biodiversity, requiring new ways of thinking and working with the land. The Fenland landscape is a microcosm of the huge global challenges caused by habitat loss, ecological degradation, and climate change. If solutions can be found to these complex issues in the Fens, then there is hope that these can also apply to similar places across the world.
