*Exploring Art for Perspective Transformation* Alexis Kokkos,2021-05-12 We live in a socio cultural reality which is dominated by an entrepreneurial and instrumental rationality as well as by a discriminative and populist mentality Questioning the validity of taken for granted sovereign perspectives is thus of vital importance Our contact with art can serve as a pathway through which we might be empowered to identify false life values and develop the disposition and ability to challenge them The learning potential of aesthetic experience is however barely exploited within educational systems In addition although major scholars have contributed to a deeper understanding of the liberating dimension of processing important artworks there has been surprisingly little discussion in the relevant literature focusing on educational practice Exploring Art for Perspective Transformation provides a comprehensive analysis and synthesis of theoretical views pertaining to the emancipatory process of exploring art Moreover it presents the educational method Transformative Learning through Aesthetic Experience TLAE with reference to particular examples of implementation TLAE is addressed to adult educators and school teachers regardless of the subject they teach and their theoretical background on aesthetics It involves engaging learners in exploring works from fine arts literature theatre cinema and music with a view to promoting critical reflection on one s potentially problematic perspectives

*Controversial Sculptures* Felicity Moreau, 2025-02-26. *Controversial Sculptures* explores the captivating history of artworks that have ignited public debate and challenged societal norms. It delves into the intersection of art history, artistic controversy and social values, examining how censorship and outrage have shaped artistic expression across time. The book highlights how sculptures serving as potent symbols can spark controversy when clashing with evolving values or challenging established authority, revealing the complex interplay between artistic intention, social context and audience reception. Examples range from classical sculptures defying religious norms to modern installations confronting political ideologies. The book progresses chronologically, starting with a framework for understanding artistic controversy and then moving through historical periods. Each chapter focuses on specific sculptures, detailing the historical circumstances, the nature of the controversy and the lasting impact on art history. For instance, Renaissance masterpieces tested the boundaries of public decency while contemporary responses are shaped by social media and identity politics. By drawing upon diverse sources, the book provides a nuanced account, encouraging readers to critically examine their assumptions about art and morality.

**Exploring art in collaboration** Lize Kriel, Runette Kruger, Bernadette Van Haute, Ernst Wagner, 2025. **Paintings and Sculptures: Where Do We Look First?** Magali Seille,Zoi Kapoula,2023-05-16 The book presents three studies in which eye tracking data were collected at the Mus e des Beaux Arts in Rouen in June and July 2013 Overall the results of those three studies highlight the knowledge gained from the analysis of the very first saccade in a museum context when people look at paintings and statues The first study analyzes how viewers orient their first saccade on paintings This study shows that in a museum the first saccade is attracted toward the center of paintings This attraction toward the paintings center is found in all the subjects groups that we have studied Noteworthy this effect is significantly less pronounced in individuals who never visit museums It is among amateurs who often visit museums that the center attracts the most the first saccade Among experts painters or art history teachers and to a lesser extent among amateurs the pictorial composition largely determines the orientation of the first saccade We indeed found that as soon as the first saccade experts orient their gaze toward the main subject This phenomenon seems to be explained by the fact that experts immediately orient their gaze here measured as the first saccade toward the paintings location conveying the most meaning It can either be the center or a peripheral area depending on whether the paintings most meaningful subject is located centrally or peripherally The second study shows that the center does not attract the first saccade in 5 year old children This behavior appears later in 8 to 10 year old children However noticeably the 8 10 year old children orient significantly less frequently their first saccade toward the paintings center as adults do and this is also true when one considers non expert adult viewers The results of the third study focus on statues and reveal a very different oculomotor behavior Indeed rather than looking at the center statues viewers exhibit a clear tendency to saccade first at the statues contours This stands in contrast with the behavior that we observe with paintings Our study concludes that statues trigger a specific oculomotor behavior The latter appears to be mostly driven by the physical presence that stone bodies incarnate The movement and the climax of this movement that sculptors manage to convey thus turn out to attract the gaze in a unique fashion The book concludes that the first saccade is a powerful indicator of the oculomotor behavior that greatly improves our comprehension of the unique relationship between a viewer and artworks
