Computers as Theatre Brenda Laurel, 2014 Brenda Laurel's Computers as Theatre revolutionized the field of human computer interaction offering ideas that inspired generations of interface and interaction designers and continue to inspire them Laurel's insight was that effective interface design like effective drama must engage the user directly in an experience involving both thought and emotion Her practical conclusion

was that a user's enjoyment must be a paramount design consideration and this demands a deep awareness of dramatic theory and technique both ancient and modern. Now two decades later Laurel has revised and revamped her influential work reflecting back on enormous change and personal experience and forward toward emerging technologies and ideas that will transform human computer interaction yet again. Beginning with a clear analysis of classical drama theory, Laurel explores new territory through the lens of dramatic structure and purpose. *Computers as Theatre* Second Edition is directed to a far wider audience, is written more simply and elegantly, is packed with new examples, and is replete with exciting and important new ideas. This book draws lessons from massively multiplayer online games and systems, social networks, and mobile devices with embedded sensors. Integrates values-driven design as a key principle. Integrates key ideas about virtual reality. Covers new frontiers including augmented reality, distributed and participatory sensing, interactive public installations, and venues and design for emergence. Once more, Brenda Laurel will help you see the connection between humans and computers as you never have before and help you build interfaces and interactions that are pleasurable, joyously right.

Springer Handbook of Acoustics Thomas Rossing, 2007-06-21. This is an unparalleled modern handbook reflecting the richly interdisciplinary nature of acoustics, edited by an acknowledged master in the field. The handbook reviews the most important areas of the subject with emphasis on current research. The authors of the various chapters are all experts in their fields. Each chapter is richly illustrated with figures and tables. The latest research and applications are incorporated throughout, including computer recognition and synthesis of speech, physiological acoustics, diagnostic imaging, and therapeutic applications, and acoustical oceanography. An accompanying CD-ROM contains audio and video files.

Sound, Music, and Motion Mitsuko Aramaki, Olivier Derrien, Richard Kronland-Martinet, Sølvi Ystad, 2014-12-04. This book constitutes the thoroughly refereed post-conference proceedings of the 10th International Symposium on Computer Music Modeling and Retrieval (CMMR 2013) held in Marseille, France, in October 2013. The 38 conference papers presented were carefully reviewed and selected from 94 submissions. The chapters reflect the interdisciplinary nature of this conference with following topics: augmented musical instruments and gesture recognition, music and emotions, representation, recognition, and audience, performers' studies, the art of sonification, when auditory cues shape human sensorimotor performance, music and sound data mining, interactive sound synthesis, non-stationarity, dynamics, and mathematical modeling, image-sound interaction, auditory perception, and cognitive inspiration, and modeling of sound and music, computational musicology.

Sound, Music, and the Moving-Thinking Body Osvaldo Glieda, Marilyn Wyers, 2014-07-08. It has long been known that practicing musicians and dancers draw upon interdisciplinary relationships between sound and movement to inform their work, and that many performance arts educators apply these relationships in working with aspiring composers, choreographers, and performers. However, most material on the subject has been to this point relegated to single chapters in books and journal articles. Now *Sound, Music, and the Moving-Thinking Body*

brings together the diverse topics researchers and practitioners across the sector are exploring and raises issues concerning the collaborative aspects of creating and performing new work Sound Music and the Moving Thinking Body is a result of the Composer Choreographer and Performer Collaboration Conference of Contemporary Music and Dance Movement 2012 hosted by the Institute of Musical Research Senate House University of London and the Department of Music at Goldsmiths University of London

From Music to Sound Makis Solomos, 2019-10-28 *From Music to Sound* is an examination of the six musical histories whose convergence produces the emergence of sound offering a plural original history of new music and showing how music had begun a change of paradigm moving from a culture centred on the note to a culture of sound Each chapter follows a chronological progression and is illustrated with numerous musical examples The chapters are composed of six parallel histories timbre which became a central category for musical composition noise and the exploration of its musical potential listening the awareness of which opens to the generality of sound deeper and deeper immersion in sound the substitution of composing the sound for composing with sounds and space which is progressively viewed as composable The book proposes a global overview one of the first of its kind since its ambition is to systematically delimit the emergence of sound Both well known and lesser known works and composers are analysed in detail from Debussy to contemporary music in the early twenty first century from rock to electronica from the sound objects of the earliest musique concrète to current electroacoustic music from the Poème électronique of Le Corbusier Varèse Xenakis to the most recent inter arts attempts Covering theory analysis and aesthetics *From Music to Sound* will be of great interest to scholars professionals and students of Music Musicology Sound Studies and Sonic Arts Supporting musical examples can be accessed via the online Routledge Music Research Portal

The Oxford Handbook of Sound and Image in Western Art Yael Kaduri, 2016-07-14 The *Oxford Handbook of Sound and Image in Western Art* examines under one umbrella different kinds of analogies mutual influences integrations and collaborations of audio and visual in different art forms The book represents state of the art case studies with key figures of modern thinking constituting a foundation for discussion It thus emphasizes avant garde and experimental tendencies while analyzing them in historical theoretical and critical frameworks The book is organized around three core thematic sections The first Sights and Sounds concentrates on the interaction between the experience of seeing and the experience of hearing Examples of painting classic and digital animation video art choreography and music performance are examined in this section Sound Space and Matter explores experimental forms emanating from the expansion of the concepts of music and space to include environmental sounds vibrating frequencies silence language human habitats the human body and more The reader will find here an analysis of different manifestations of this aesthetic shift in sound art fine art contemporary dance multimedia theatre and cinema The last section Performance Performativity and Text shows how new light shed by modernism and the avant garde on the performative aspect of music have led it together with sound voice and text to become active in new ways in postmodern and contemporary art creation In addition to examples of

real time performing arts such as music theatre experimental theatre and dance it includes case studies that demonstrate performativity in fine art visual poetry short film and cinema Sitting at the cutting edge of the field of music and visual arts the book offers a unique at times controversial view of this rapidly evolving area of study Artists curators students and scholars will find here a panoramic view of cutting edge discourse in the field by an international roster of scholars and practitioners
