Group Life Gary Alan Fine, Tim Hallett, 2022-10-04 Sociological analysis is replete with debates about micro and macro individual and society but all too often these miss the point interacting groups are the hinge that connects the two To understand how structures matter and how individuals navigate them we must take groups and people in local communities seriously Gary Alan Fine and Tim Hallett skillfully argue that sociologists have the obligation to examine the role of small communities in the creation of both the interaction order and structural realities With novel concepts and rich ethnographic examples this book describes how group commitments shape selves and society emphasizing the importance of a meso level approach to social organization Fine and Hallett provide new models of identity culture conflict and control and consider how a network of groups can provide insight into extended communication channels and social media lattices Ultimately they show that despite the importance of institutions and individuals group life is the fundamental building block of community This timely book makes the case for a local sociology that includes sociality It will be a welcome resource for students and sociologists and a necessary call to action for the discipline as a whole

Knowledge and Civil Society Johannes Glückler, Heinz-Dieter Meyer, Laura Suarsana, 2021-12-08 This open access book focuses on the role of civil society in the creation dissemination and interpretation of knowledge in geographical contexts It offers original interdisciplinary and counterintuitive perspectives on civil society The book includes reflections on civil and uncivil society the role of civil society as a change agent and on civil society perspectives of undone science Conceptual approaches go beyond the tripartite division of public private and civic sectors to propose new frameworks of civic networks and philanthropic fields which take an inclusive view of the connectivity of civic agency across sectors This includes relational analyses of epistemic power in civic knowledge networks as well as of

regional giving and philanthropy The original empirical case studies examine traditional forms of civic engagement such as the German landwomen s associations as well as novel types of organizations such as giving circles and time banks in their geographical context The book also offers insider reflections on doing civil society such as the cases of the Umbrella Movement in Hong Kong epistemic activism in the United States and the FeesMustFall movement in South Africa *I, Citizen* Tony Woodlief,2021-12-07 This is a story of hope but also of peril It began when our nation s polarized political class started conscripting everyday citizens into its culture war From their commanding heights in political parties media academia and government these partisans have attacked one another for years but increasingly they ve convinced everyday Americans to join the fray Why should we feel such animosity toward our fellow citizens our neighbors even our own kin Because we ve fallen for the false narrative eagerly promoted by pundits on the Left and the Right that citizens who happen to vote Democrat or Republican are enthusiastic supporters of Team Blue or Team Red Aside from a minority of party activists and partisans however most voters are simply trying to choose the lesser of two evils The real threat to our union isn t Red vs Blue America it s the quiet collusion within our nation s political class to take away that most American of freedoms our right to self governance Even as partisans work overtime to divide Americans against one another they ve erected a system under which we ordinary citizens don t have a voice in the decisions that affect our lives From foreign wars to how local libraries are run authority no longer resides with We the People but amongst unaccountable officials The political class has stolen our birthright and set us at one another s throats This is the story of how that happened and what we can do about it America stands at a precipice but there s still time to reclaim authority over our lives and communities **The Sociology of Caregiving** John G. Bruhn,Howard M. Rebach,2014-05-27 This volume conceptualizes caregiving as an emerging sociological issue involving complex and fluctuating roles The authors contend that caregiving must be considered in the context of the life span with needs that vary according to age developmental levels mental health needs and physical health demands of both caregivers and care recipients As the nature and functions of caregiving evolve it has become a critical and salient issue in the lives of individuals in all demographic socioeconomic and ethnic categories This volume frames caregiving as a sociological issue and addresses a number of central concerns such as Caregiving is a life span experience associated with aging and the roles of spouses and adult children Caregiving involves a complex of social system variables that influence the social support and services to caregivers and care recipients The nature of the relationship among family caregivers professional caregivers and the care recipient are embedded in their interaction and dynamics influenced by the internal and external variables that inhibit or facilitate the care situation How can caregiving be integrated with a public health agenda What disparities or inequalities exist in caregiving and what are the barriers that sustain them What community based interventions need to be developed to improve caregiving Democracy's Voices Robert M. Fishman,2018-07-05 Building on one of sociology s core ideas that social ties can shape collective outcomes Democracy s Voices shows that connections

across class boundaries can remake public rhetoric and thus the quality of democratic life Robert M Fishman takes up a question of enduring significance to people concerned with the quality of democratic public life focusing on why political rhetoric proves engaging and broadly relevant or disengaging and narrow The answer to that question he argues is to be found not only in the deeds of prominent politicians and the nature of official institutions but also in the existence and the character of social connections among ordinary citizens Fishman's book based on long term fieldwork and systematic survey research in Spain identifies the special contribution to democratic quality made by conversations between intellectuals and workers Fishman focuses on what he calls the discursive horizons of local leaders and communities the actual location of the problems and proposed remedies articulated in political rhetorics Democracy's Voices shows how the subcultural context of social ties may accentuate or diminish their power to reshape rhetorics Fishman argues that conversations are able to remake public rhetorics whereas ties that take the form of brokerage lack that ability The book also offers a general critique of social capital theory and argues that the full ability of social ties to shape collective outcomes can only be observed when one distinguishes in useful ways among types of ties
