Loosing The Bonds:

Loosing the Bonds Robert Massie,1997 In the aftermath of World War II South Africa s white government decreed a brutal system of segregation at the very moment when the United states began wresting with the civil rights movement In Loosing the Bonds Robert Massie recreates the passions and struggles of these years deftly exposing the way politics and personalities money and morality interact in modern America 40 photos National print ads media **Between Homeland and Motherland** Alvin B. Tillery, Jr.,2011-03-15 In Between Homeland and Motherland Alvin B Tillery Jr considers the history of political engagement with Africa on the part of African Americans beginning with the birth of Paul Cuffe s back to Africa movement in the Federal Period to the Congressional Black Caucus struggle to reach consensus on the African Growth and Opportunity Act of 2000 In contrast to the prevailing view that pan Africanism has been the dominant ideology guiding black leaders in formulating foreign policy positions toward Africa Tillery highlights the importance of domestic politics and factors within the African American community Employing an innovative multimethod approach that combines archival research statistical modeling and interviews Tillery argues that among African American elites activists intellectuals and politicians factors internal to the community played a large role in shaping their approach to African issues and that shaping U S policy toward Africa was often secondary to winning political battles in the domestic arena At the same time Africa and its interests were important to America s black elite and Tillery s analysis reveals that many black leaders have strong attachments to the motherland Spanning two centuries of African American engagement with Africa this book shows how black leaders continuously balanced national transnational and community impulses whether distancing themselves from Marcus Garvey s back to Africa movement supporting the anticolonialism movements of the 1950s or opposing South African apartheid in the 1980s **The Saints' Sacrifice: Or, A Commentary on Psalm CXVI, Etc** William Gouge,1868

Trafficking with Demons Martha Rampton, 2022-01-15 Trafficking with Demons explores how magic was perceived practiced and prohibited in western Europe during the first millennium CE Through the overlapping frameworks of religion ritual and gender Martha Rampton connects early Christian reckonings with pagan magic to later doctrines and dogmas Challenging established views on the role of women in ritual magic during this period Rampton provides a new narrative of the ways in which magic was embedded within the foundational assumptions of western European society informing how people understood the cosmos divinity and their own Christian faith As Rampton shows throughout the first Christian millennium magic was thought to play a natural role within the functioning of the universe and existed within a rational cosmos hierarchically arranged according to a great chain of being Trafficking with the demons of the lower air was the essence of magic Interactions with those demons occurred both in highly formalistic ritual settings and on a routine and

casual basis Rampton tracks the competition between pagan magic and Christian belief from the first century CE when it was fiercest through the early Middle Ages as atavistic forms of magic mutated and found sanctuary in the daily habits of the converted peoples and new paganisms entered Europe with their own forms of magic By the year 1000 she concludes many forms of magic had been tamed and were by the reckoning of the elite essentially ineffective as were the women who practiced it and the rituals that attended it
