Wright, Tilly Edinger, and Richard Van Frank, 1962 **Bones and Ochre** Marianne Sommer, 2007 When ochre stained bones were unearthed by William Buckland in a Welsh cave in 1823 they raised many unsettling questions regarding their origin and inspired the casting and recasting of the character who became known as the Red Lady Her biography reflects the personal professional and national ambitions of those who studied her *Handbook of American Private Schools*, 1928 This handbook aims to be a guide to the best private schools of the country It has been undertaken with the parent especially in mind but it is hoped that it may be of value to school and college authorities and all others interested in the subject It is believed that this Handbook is the first volume which attempts a critical and discriminating treatment of the private schools of the country It is an endeavor to classify the schools on their merits at least a step it is hoped toward eventual standardization Editor's foreword *American Anthropology, 1946-1970* Robert F. Murphy, 2002-01-01 From the early Cold War years through the social unrest and activism of the 1960s American anthropology expanded considerably in size and outreach becoming spectacularly global and cross cultural in its interests Complex societies and communities became increasingly popular subjects of inquiry the influence of sociological methods upon fieldwork and interpretation grew a reimagined cultural evolution emerged and a pervasive interest in the broader forces of culture change shaped research writing and theory throughout the quarter century A dynamic range of schools of anthropological thought flowered cultural ecology structural functionalism ethnoscience and in the last years of the era French structuralism The American Anthropological Association became a forum of political debate in the 1960s and its membership included more people of color but fewer women than previously The twenty two selections in this volume highlight the many telling achievements and enduring insights in American anthropology during the first few decades after World War II An introduction to these essays by Robert F Murphy provides a historical and critical backdrop for understanding the changes and continuity in American anthropology during this time *History Within* Marianne Sommer, 2016-05-27 Personal genomics services such as 23andMe and Ancestry.com now offer what once was science fiction the ability to sequence and analyze an individual's entire genetic code promising in some cases facts about that individual's ancestry that may have remained otherwise lost Such services draw on and contribute to the science of human population genetics that attempts to reconstruct the history of humankind including the origin and movement of specific populations Is it true though that who we are and where we come from is written into the sequence of our genomes Are genes better documents for determining our histories and identities than fossils or other historical sources Our interpretation of gene sequences like our interpretation of other historical evidence inevitably tells a story laden with political and moral values Focusing on the work of Henry Fairfield Osborn Julian Sorell Huxley and Luigi Luca Cavalli Sforza in paleoanthropology evolutionary biology and human population genetics *History Within* asks how the

sciences of human origins whether through the museum the zoo or the genetics lab have shaped our idea of what it means to be human How have these biologically based histories influenced our ideas about nature society and culture As Marianne Sommer shows the stories we tell about bones organisms and molecules often change the world
