critical reasoning Author P A Ransom explores the evolution of the brain what reality is and how we search for it in our complex world He addresses the question of our assumptions about truth and faith and how when faith is added to the equation it can destroy the credibility of anything it wishes We all live in a world that is constructed in the mind Our senses tell us that the world is real We just accept as fact that what our senses reveal to us is not an illusion Yet even our senses can be tricked if you have experienced an illusion like a magic trick or special effects you know how easily the brain can be deceived What we think we know is sometimes far from the truth No matter how well considered our knowledge is it is always subject to change as our understandings evolve It would be prudent then to reexamine our beliefs Warning Reality May Not Be Compatible with Your Worldview exposes the truth about dogma and rituals that lead our minds into delusional beliefs When we embrace ignorance we turn our backs on truth and close our minds to new ideas and discoveries **How to Survive**
