Organizational Behavior in Sport Management Christopher R. Barnhill, Natalie L. Smith, Brent D. Oja, 2021-04-09

This textbook presents a comprehensive analysis of organizational behavior in sport organizations from a practitioner's perspective. It covers issues related to managing employees and work teams as well as organizational structure and culture in sport. The book has four sections: Organizational Behavior in the Sports Industry, Getting to Know Employees and Volunteers of Sport Organizations, Work Groups and Teams, and Understanding the Organization. Each chapter begins with a practitioner interview describing a challenge that was overcome by their organization. That example is used to highlight applicable theories and interventions used in the industry. Additional examples or theories are discussed to provide students a broad picture of managerial issues in the sports industry and provide alternative approaches to intervention illustrated in the practitioner interview. The case studies offer the opportunity to practice and apply the ideas to real world scenarios in the sports industry. Students using this book will gain an understanding of how managers and leaders apply theory to communicate with and engage employees to foster desired organizational cultures while being challenged to address common issues using cases and hypothetical situations.

Information Technology David A. Powner, 2010-10 In FY 2009 the fed gov t planned to spend 71 billion on information technology IT investments. To more effectively manage such investments agencies were directed to implement earned value management (EVM). EVM is a project management approach that provides objective reports of project status, produces early warning signs of impending schedule delays and cost overruns, and provides unbiased estimates of anticipated costs at completion. This report assessed selected agencies' EVM policies, determined whether they are adequately using EVM techniques to manage key system acquisitions, and evaluated selected investments' EVM data to determine their cost and schedule performances.
