Managed Behavioral Health Care: Current Realities and Future Potential David Mechanic,1998-07-14 Discussions of managed care are dominated by emotion and rhetoric and failure to differentiate among the varying structures approaches and strategies that are called managed care These discussions rarely take account of the complexity of the arena or the failures of mental health

systems prior to the introduction of managed care If we are to shape managed care constructively we first need clear understanding of how it is structured how it functions and when it performs well and poorly This should help identify how practices can best be monitored evaluated and if necessary regulated This book will help readers along this path This is the 78th issue of the quarterly journal *New Directions for Mental Health Services* For more information on the series please see the Journals and Periodicals section

Changing Welfare Rachel A. Gordon, Herbert J. Walberg, 2012-12-06 *Changing Welfare* is concerned with the sweeping changes that took place in public assistance programs at the end of the 20th century and the way in which the original and reformed versions of these programs relate to the well being of children and their families The authors critically review the original conceptualizations and the new directions of programs offering cash assistance food assistance health insurance and child protection services to low income and disabled children and their families thus changes in the welfare programs themselves And throughout their concern is with whether and how these programs alter the opportunities for the development of the children targeted by these programs thus changes in the welfare of children and their families The objective of each chapter of the book is to rigorously highlight key theoretical and research issues including the identification of major empirical findings and unanswered questions Wherever relevant the chapters connect theory and research to policy and practice pointing to recommendations and challenges for the future including alternative approaches for research policy and practice

Changing Health Care Systems and Rheumatic Disease Institute of Medicine, Committee on Changing Health Care Systems and Rheumatic Disease, 1997-01-09 Market forces are driving a radical restructuring of health care delivery in the United States At the same time more and more people are living comparatively long lives with a variety of severe chronic health conditions Many such people are concerned about the trend toward the creation of managed care systems because their need for frequent often complex medical services conflicts with managed care's desires to contain costs The fear is that people with serious chronic disorders will be excluded from or underserved by the integrated health care delivery networks now emerging Responding to a request from the National Institute of Arthritis and Musculoskeletal and Skin Diseases this book reflects the results of a workshop that focused on the following questions Does the model of managed care or an integrated delivery system influence the types of interventions provided to patients with chronic conditions and the clinical and health status outcomes resulting from those interventions If so are these effects quantitatively and clinically significant as compared to the effects that other variables e g income education ethnicity have on patient outcomes If the type of health care delivery system appears to be related to patient care and outcomes can specific organizational financial or other variables be identified that account for the relationships If not what type of research should be pursued to provide the information needed about the relationship between types of health care systems and the processes and outcomes of care provided to people with serious chronic conditions
