Management Guidelines for Exotic Cats John Partridge,1991-01-01 Training Materials for Animal Facility Personnel

Michael D. Kreger,1995 **Behavioral Ecology and Conservation Biology** Tim Caro,1998-08-27 In just the last few years behavioral ecologists have begun to address issues in conservation biology This volume is the first attempt to link these disciplines formally Here leading researchers explore current topics in conservation biology and discuss how behavioral ecology can contribute to a greater understanding of conservation problems and conservation intervention programs In each chapter the authors identify a conservation issue review the ways it has been addressed review behavioral ecological data related to it including their own evaluate the strengths and weaknesses of the behavioral ecological approach and put forward specific conservation recommendations The chapters juxtapose different studies on a wide variety of taxonomic groups A number of common themes emerge including the ways in which animal mating systems affect population persistence the roles of dispersal and inbreeding avoidance for topics such as reserve design and effective population size the key role of humans in conservation issues and the importance of baseline data for conservation monitoring and modeling attempts Each chapter sheds new light on conservation problems generates innovative avenues of interdisciplinary research and shows how conservation minded behavioral ecologists can apply their expertise to some of the most important questions we face today *Fowler's Zoo and Wild Animal Medicine Current Therapy, Volume 7* R. Eric Miller,Murray E.

Fowler,2011-07-11 With coverage of current issues and emerging trends Fowler s Zoo and Wild Animal Medicine Volume 7 provides a comprehensive all new reference for the management of zoo and wildlife diseases A Current Therapy format emphasizes the latest advances in the field including nutrition diagnosis and treatment protocols Cutting edge coverage includes topics such as the One Medicine concept laparoscopic surgery in elephants and rhinoceros amphibian viral diseases and advanced water quality evaluation for zoos Editors R Eric Miller and Murray E Fowler promote a philosophy of animal conservation bridging the gap between captive and free ranging wild animal medicine with chapters contributed by more than 100 international experts The Current Therapy format focuses on emerging trends treatment protocols and diagnostic updates new to the field providing timely information on the latest advances in zoo and wild animal medicine Content ranges from drug treatment nutrition husbandry surgery and imaging to behavioral training Coverage of species ranges from giraffes elephants lions and orangutans to sea turtles hellbenders bats kakapos and more An extensive list of contributors includes recognized authors from around the world offering expert information with chapters focusing on the latest research and clinical management of captive and free ranging wild animals A philosophy of animal conservation helps zoo and wildlife veterinarians fulfill not only the technical aspects of veterinary medicine but contribute to the overall biological teams needed to rescue many threatened and endangered species from extinction All content is new with coverage including coverage of cutting edge issues such as white nose disease in bats updates on Ebola virus in wild great apes and chytrid

fungus in amphibians Full color photographs depict external clinical signs for more accurate clinical recognition Discussions of the One Medicine concept include chapters addressing the interface between wildlife livestock human and ecosystem health New sections cover Edentates Marsupials Carnivores Perrissodactyla and Camelids Over 100 new tables provide a quick reference to a wide range of topics An emphasis on conserving threatened and endangered species globally involves 102 expert authors representing 12 different countries

Cheetahs of the Serengeti Plains Timothy M. Caro, 1994-08-15 Cheetahs of the Serengeti Plains is the most comprehensive account of carnivore social behavior to date Synthesizing more than a decade of research in the wild this book offers a detailed account of the behavior and ecology of cheetahs Compared with other large cats and other mammals cheetahs have an unusual breeding system whereas lions live in prides and tigers are solitary some cheetahs live in groups while others live by themselves Tim Caro explores group and solitary living among cheetahs and discovers that the causes of social behavior vary dramatically even within a single species Why do cheetah cubs stay with their mother for a full year after weaning Why do adolescents remain in groups Why do adult males live in permanent associations with each other Why do adult females live alone Through observations on the costs and benefits of group living Caro offers new insight into the complex behavior of this extraordinary species For example contrary to common belief about cooperative hunting in large carnivores he shows that neither adolescents nor adult males benefit from hunting in groups With many surprising findings and through comparisons with other cat species Caro enriches our understanding of the evolution of social behavior and offers new perspectives on conservation efforts to save this charismatic and endangered carnivore

Zoo Biology ,1982

Health and Welfare of Brachycephalic (Flat-faced) Companion Animals Rowena Packer, Dan O'Neill, 2021-08-06 Health and welfare issues of brachycephalic flat faced animals are one of the most pressing problems facing companion animals right now Dogs in particular are suffering from a brachycephalic crisis resulting from a perfect storm where predispositions to an array of health issues are amplified by a population boom for certain brachycephalic breeds such as the French Bulldog and Pug But yet for many owners these dogs represent the perfect companion endearing personas and cute looks in a socially desirable package So where is the truth in all of this This book will equip veterinary professionals animal welfare scientists breeders and owners with the fuller story about brachycephalic health and welfare The first half of the book provides the context of how and why we are in this crisis offering in depth historical social ethical communication nursing welfare epidemiological genetics and international perspectives The second half shifts towards the clinical arena with chapters that cover the background diagnosis treatment and prevention of the many unique healthcare needs of brachycephalic animals Cutting edge knowledge is shared on a range of disciplines including respiratory disease ophthalmology dermatology

dentistry neurology obesity reproduction and anesthesia With twenty chapters written by world leading experts lifetimes of experience and knowledge are condensed into the first book dedicated exclusively to brachycephaly in companion animals This essential reference resource will inform challenge and stimulate it will open your mind to new opportunities for you to improve the welfare of brachycephalic animals by your personal and collective choices and actions But prepare to be surprised you may just find that your views on brachycephaly in companion animals will be changed forever *Restoring Nature* Lary M. Dilsaver, Timothy J. Babalis, 2023 Off the coast of California running from Santa Barbara to La Jolla lies an archipelago of eight islands known as the California Channel Islands The northern five were designated as Channel Islands National Park in 1980 to protect and restore the rich habitat of the islands and surrounding waters In the years since that mission intensified as scientists discovered the extent of damage to the delicate habitats of these small fragments of land and to the surprisingly threatened sea around them In *Restoring Nature* Lary M Dilsaver and Timothy J Babalis examine how the National Park Service has attempted to reestablish native wildlife and vegetation to the five islands through restorative ecology and public land management The Channel Islands staff were innovators of the inventory and monitoring program whereby the resource problems were exposed This program became a blueprint for management throughout the U S park system Dilsaver and Babalis present an innovative regional and environmental history of a little known corner of the Pacific West as well as a larger national narrative about how the Park Service developed its approach to restoration ecology which became a template for broader Park Service policies that shaped the next generation of environmental conservation
