**Water and Human Societies** David A. Pietz, Dorothy Zeisler-Vralsted, 2021-08-18 This book explores the historical relationships between human communities and water Bringing together for the first time key texts from across the literature it discusses how the past has shaped our contemporary challenges with equitable access to clean and ample water supplies The book is organized into chapters that explore thematic issues in water history including Water and Civilizations Water and Health Water and Equity and Water and Sustainability Each chapter is introduced by a critical overview of the theme followed by four primary and secondary readings that discuss critical nodes in the historical and contemporary development of each chapter theme Further readings at the end of each chapter invite the reader to further explore the dynamics of each theme The foundational premise of the book is that in order to comprehend the complexity of global water challenges we need to understand the history of cultural forces that have shaped our water practices These historical patterns shape the range of choices available to us as we formulate responses to water challenges The book will be a valuable resource to all students interested in understanding the challenges of water use today

*Ecological Changes in the Zambezi River Basin* Mzime Ndebele-Murisa, 2021-01-11 This book provides an analysis of the ecological conditions and ecosystem goods and services of the Zambezi River Basin ZRB the fourth largest river in Africa Various environmental and anthropogenic factors inclusive of climate environmental flows hydrology morphology pollution and land use changes among others and their interactions are considered as drivers of the river ecosystems The impacts of these drivers on aquatic biota river ecological integrity and the livelihoods of surrounding communities are analysed within the socio economic policy context The book goes beyond the usual inventories and basic research by using the comparative research method CRM in a trans disciplinary manner This CRM analytical approach in this book seeks to interrogate the differences or similarities in socio economic systems livelihoods ecological systems ecosystem goods and services their usage and management under the seemingly different cultural socio economic conditions expected across borders that are within the ZRB The multidisciplinary approach also connects the typical ecological research with social dimensions in a holistic manner The book therefore provides empirical and research based evidence to support strategic planning and policy development in the wake of ecological changes that nations and indeed regions such as the ZRB

are grappling with while seeking to sustainably manage precious river systems      Water Politics and the On-Paper Hydropower Boom Özge Can Dogmus,2024-06-28 This book examines how the on paper hydropower boom impacts the safe and fair access to water and energy in emerging economies The global hydropower boom is largely made up of small hydropower plants located in emerging economies but a lack of funding over ambitious planning and corruption have halted the production of these projects Describing this state as the on paper hydropower boom this book shifts attention to the hydrosocial problems arising from hydropower projects that remain on paper It examines how these proposed but unbuilt projects can lead to disruptions in the control and governance of water resources and increase the international dependence of emerging countries due to deep problems in their sustainable development planning and how all this can affect both ecosystems and the communities that depend on them In doing so it critically examines the dominant discourses on energy security and sustainable development emphasises the extent to which the effects of global imperialism are at play and examines the effects of international power relations in the hydrosocial context and their implications for perpetuating international relations of dependency Further this book provides a unique perspective on the global hydropower boom by highlighting that although the global hydropower boom largely remains on paper it can still have a significant impact on human water systems Contributing to the debate on hydrosocial relationships each chapter offers an insightful examination of the social cultural and political interactions that humans have with water and uses these insights to provide a nuanced understanding of the challenges and issues associated with on paper plans This book will be of great interest to students and scholars of water politics water governance political ecology corruption and environmental economics as well as sustainable development policymakers      *Multi-Stakeholder Platforms for Integrated Water Management* Jeroen Warner,2016-09-17 As they provide a negotiating space for a diversity of interests Multi Stakeholder Platforms MSPs are an increasingly popular mode of involving civil society in resource management decisions This book focuses on water management to take a positive if critical look at this phenomenon Illustrated by a wide geographical range of case studies from both developed and developing worlds it recognizes that MSPs will neither automatically break down divides nor bring actors to the table on an equal footing and argues that MSPs may in some cases do more harm than good The volume then examines how MSPs can make a difference and how they might successfully co opt the public private and civil society sectors The book highlights the particular difficulties of MSPs when dealing with integrated water management programmes explaining how MSPs are most successful at a less complex and more local level It finally questions whether MSPs are or can be sustainable and puts forward suggestions for improving their durability      **Regional Management of Water Resources** International Association of Hydrological Sciences. Scientific Assembly,2001      *Handbook of African Development* Tony Binns,Kenneth Lynch,Etienne Nel,2018-04-27 This handbook presents an extensive new overview of African development past present and future It addresses key core themes and topics that are pertinent to the continent s development including sections on

history health and food politics economics rural and urban development and development policy and practice The volume draws on the expertise of over 60 of the world's leading scholars to provide a detailed and up to date analysis of the key opportunities and challenges that confront Africa and how such issues are being addressed Arranged by key themes the handbook provides not only a historical understanding of the past but also political perspectives on the future The chapters provide critically informed analyses of their topics by drawing upon the latest conceptual viewpoints and applied experiences in Africa in the form of case studies to offer a comprehensive examination of the opportunities challenges key debates and future prospects This handbook is an invaluable state of the art overview and reference concerning many different aspects of Africa's development which will be of interest to academics in all fields of African studies and also academics and students working in cognate disciplines such as development studies geography history politics and economics
