Reviews of the First edition A massive review of the art and science of the management of projects that has the great virtue of being a good read wherever it is touched. It spills the dirt on things that went wrong, elucidates the history so you can understand the industry's current stance, draws on other countries' experience and explains the latest management processes. Throughout it is liberally sprinkled with anecdotes and case histories which amply illustrate the dos and don'ts for practitioners wishing to deliver projects on time to expected quality and price. A valuable book for students and practitioners alike. John D Findlay, Director, Stent. This is a valuable source for practitioners and students. It covers the A-Z of project management in a confident, contemporary manner and provides a powerful and much-needed conceptual perspective in place of a purely prescriptive approach. The engaging presentation introduces a range of challenges to established thinking about project management often by making comparisons between practices in the UK and those of other countries. Peter Lansley, Professor of Construction Management, University of Reading. A refreshing and unique study of information management and its impact upon international construction project management. The book is well presented and written, logical and succinct and is flexible enough to allow readers to either read from start to finish or to dip into selected chapters. This book deserves to be an established text for any construction or civil engineering undergraduate and/or postgraduate course. CNBR, 25th November 2003. Generous use is made of anecdotes and case histories throughout to support the theory the book illustrates, the mistakes made by others and the means to deliver projects on time and to cost. *Building Services Journal*, April 2004.
