## **Old Mission Academy A Novel Of One Charter Schools Experiences Implementing Lean Education:**

**The Old Mission Academy** J. K. Thompson, 1998      *Hard Lessons* Jonathan Schorr, 2002 A decade ago there were only two charter schools in the United States Today there are more than 2 400 serving more than half a million students Charter schools are public schools that are free from many of the regulations that have long governed public education Supporters include many of the country s most prominent educators and politicians among them President George W Bush who hope charter schools will reshape education especially where it proves most challenging in the inner city The fact that most charter schools promise smaller classes and more parental involvement makes them immensely appealing to the nation s most disadvantaged families Charter school detractors on the other hand fear that these alternative schools will irredeemably ruin public education drawing away the talented students and the most involved parents Clearly the stakes are high But few Americans understand what a charter school really is or what is involved in trying to create attend and teach in one Written by a renowned journalist and education writer and a former inner city school teacher himself *Hard Lessons* is the first book to capture the human drama of the entire experience For three years Jonathan Schorr was allowed complete access to the students teachers and parents of the E C Reems Academy in Oakland California making him uniquely qualified to tell their fascinating story But would the new school succeed in effectively teaching children from urban neighborhoods where success is rare Would it become a whole new bureaucracy or sabotage itself from within The answers are found in the moving stories of some deeply involved yet very different individuals Among them there is Nazim Casey Jr rescued from his crack addicted parents he s the last chance child who will put inner city charters to their ultimate test William Stewart a father whose fury at his daughter s failed public school propels him into activism Eugene Ruffin the entrepreneur who helped introduce the personal computer to America then collaborated with Wal Mart heir John Walton to invest in education and Valentin Del Rio a young teacher whose idealism turns to exhaustion and the search for a punctual paycheck Through successes and setbacks *Hard Lessons* reveals just how difficult it is even with the best of intentions to offer a quality education to every child in America The story of E C Reems Academy offers invaluable lessons for anyone interested in America s most pressing domestic concern At once harrowing and hopeful and in the finest tradition of modern nonfiction *Hard Lessons* is one of the most important books to come along in decades      **A Light Shines in Harlem** Mary C. Bounds, Wyatt Tee

Walker, 2014-09-01 *A Light Shines in Harlem* tells the fascinating story of the Sisulu Walker Charter School of Harlem the first charter school in New York and of the charter movement It is a penetrating look at the host of real world decisions that make a charter school or any school succeed And it is a true to life inspirational tale of how a hero of the civil rights movement a Wall Street star educators inner city activists parents and students all joined together to create a groundbreaking school that in its best years far outperformed other schools in the neighborhoods in which most of its children lived This book also looks at education reform through a broader lens It discusses the most recent research and

issues facing the charter movement a movement which now educates more than 25 million students nationwide *A Light Shines in Harlem* describes the strengths and weaknesses of charter schools and explains how lessons from them can be applied to other schools to make all schools better The result is not only the gripping inside narrative of how one school fought to succeed despite the odds but also an illuminating glimpse into the future of American education [Hit the Drum](#) Sarah Tantillo, 2019-06-03 The first state charter school law was passed in Minnesota in 1991 The idea that teachers parents and other community members could launch these independent public schools of choice proceeded to spread rapidly across the country Within two decades many charter schools had long waiting lists and parents willing to march on their behalf By 2017 more than 6900 charter schools were operating in 44 states plus DC serving 32 million children In spite of the controversy that often swirls around them charter schools have dropped strong roots into the field of education *HIT THE DRUM* is a page turning narrative that gives an insider's perspective to explain how this transformation happened It tells the engaging stories of several dozen unsung heroes and heroines many of them classroom teachers who decided to change their lives in order to join this grassroots movement which has dramatically altered the landscape of public education in America If you are interested in education reform or how social movements grow and spread or if you want to understand more about why we have the kinds of schools we do and how schools might look in the future this book is a must read

NOTE ON METHODOLOGY

ABOUT THE AUTHOR

NOTES [John Adams Academy Leading a Revolution in Education](#) L. Dean Forman, 2020-09-17 John Adams said Children must be educated in the principles of freedom This means all children I have written this book to make it easier for you or anyone who chooses to

build such a school I have lived this work now for 11 years with all the challenges that come with such a project It has been a blessing a joy and a lot of fruitful work If you want to build an American classical leadership school for your neighborhood this book will make it easier I am passing on to you the benefit of my experience on this project and I am including the major issues needs tasks challenges templates choices and pieces that need to be addressed in order to succeed and thrive When the idea for such a school came I wasn't entirely surprised I had been unwittingly preparing for it for years I knew it mattered and I know today that the same idea matters for a lot of other communities If yours is one of them this idea may be the most important thing you will think about in the days weeks and months ahead Ideas are powerful Ideas are the seeds of real change and the catalysts of real progress The result of applying these principles in a school setting has been a resounding success measured in terms of a culture of virtue learning and freedom I want to get the experiences of an established charter school and how to create one into the minds homes and communities of America just as Thomas Paine's Common Sense Thomas Jefferson's Declaration of Independence and Adam Smith's Wealth of Nations did with their work in 1776 Education is ripe for disruption and revolution I believe education to be the largest civil natural rights restraint and violation of our time Charter schools represent the legalization of more freedom to families and the people If the idea of an American classical leadership school in your community resonates and if you're up for the task or wonder if you might be this book is for you

Scripting the Moves Joanne W. Golann, 2021-06-08 An inside look at a no excuses charter school that reveals this educational model's strengths and weaknesses and how its approach shapes students Silent single file lines Detention for putting a head on a desk Rules for how to dress how to applaud how to complete homework Walk into some of the most acclaimed urban schools today and you will find similar recipes of behavior designed to support student achievement But what do these scripts accomplish Immersing readers inside a no excuses charter school Scripting the Moves offers a telling window into an expanding model of urban education reform Through interviews with students teachers administrators and parents and analysis of documents and data Joanne Golann reveals that such schools actually dictate too rigid a level of social control for both teachers and their predominantly low income Black and Latino students Despite good intentions scripts constrain the development of important interactional skills and reproduce some of the very inequities they mean to disrupt Golann presents a fascinating sometimes painful account of how no excuses schools use scripts to regulate students and teachers She shows why scripts were adopted what purposes they serve and where they fall short What emerges is a complicated story of the benefits of scripts but also their limitations in cultivating the tools students need to navigate college and other complex social institutions tools such as flexibility initiative and ease with adults Contrasting scripts with tools Golann raises essential questions about what constitutes cultural capital and how this capital might be effectively taught Illuminating and accessible Scripting the Moves delves into the troubling realities behind current education reform and reenvisions what it takes to prepare students for long term success

The Charter School Experience

,2002     **The Miracle on Cooper Street** Gloria Bonilla-Santiago, PhD,2014-03 Author Dr Gloria Bonilla Santiago a Puerto Rican child of migrant farm workers defied family tradition and expectations to reach the highest ranks of academia and overcome monumental obstacles to create LEAP Academy one of the nation s best charter schools In this book she shares the challenges and obstacles potential resources and support of fellow professionals that moved LEAP Academy from a small charter school in 1997 to its top position today She describes and analyzes the establishment and accomplishments of LEAP Academy in one of America s poorest and most violent cities Camden New Jersey She also shares the story of her personal and professional struggles as a Latina from an impoverished and working class background surviving and fighting for respect in an academic world that many times did not value racial or ethnic diversity Those experiences forged a dream of transforming a poor urban community through education This book presents a working model for charter schools while at the same time admitting that LEAP is a work in progress Most of all it describes an inspiring institution that has seen many young people break the cycle of poverty graduate from high school succeed in college and go on to live productive lives Back cover

**Keeping the Promise** Samuel Yigzaw,2008-02-10 For parents teachers administrators and policy makers this is an insider s look at how charter schools successfully challenge the assumption that there is only one model of public education Charter school cofounder and administrator Samuel Yigzaw PhD shares the inspiring true journey of Minnesota s Higher Ground Academy from its initial vision to the school of choice it is today a thriving institution that is in touch with reality and responsive to the needs of diverse learners complete with a lengthy student waiting list Candid insightful and informative Yigzaw documents the turbulent start up years of Higher Ground Academy the school s continued day to day struggles to stay true to its mission and the accomplishments and rewards they ve already achieved as the school continues to grow and evolve Yigzaw offers a brief history of the charter school movement an in depth discussion of what sets charter schools apart from traditional public schools and a thorough examination of No Child Left Behind the Standards movement and what he sees as the four greatest concerns for modern charter schools Anyone dedicated to students and passionate about revitalizing public education in the United States will be encouraged by this charter school success story and more motivated than ever to ensure a quality education for all students

**The Last One Hundred and Eighty Days** Keitha D. Burnett,2019-03-23 If there is case against high stakes testing The Last One Hundred and Eighty Days is a must read This book chronicles the challenges of operating an independent charter school serving a population with ninety nine percent of students receiving free or reduced lunch in one of the largest school districts in America It details the most critical year in its history in which the school must make a passing grade in the midst of constant state changes in the state wide assessment One questionable policy that was implemented during this time is the decrease in the number of students that are needed in each grade level for a school to receive a grade The number decreased from 29 to 10 in spite of the fact that statistically a population size should hover around 25 30 to increase the reliability and validity of the testing results Ironically policies are quickly put in

place to prevent any school from dropping more than two letter grades however there were no policies put in place to account for schools that are ranked at the bottom but show substantial gains Painstakingly if the elementary school is not successful the fate of school will negatively impact the middle and high school because they share the same facility and resources The middle and high school was one of the first secondary charter schools accredited by the Southern Association of Schools and Colleges in the southern region of the county The overall purpose of this book is to highlight some systemic problems that directly and indirectly affect students parents educators and the community at large in the trenches particularly in low income areas It is the premise of this book that it is nearly impossible to make a significant difference statistically in the performance of low socio economic and academic performance within a short timeframe on standardized tests without resorting to data manipulation or other undesirable means It further suggests that in the quest for accountability the richness inherent in the education process particularly at schools that have a high percentage of low performing students has been lost We are failing to educate all our children It also suggests that the creaming effect that is occurring in poor neighborhoods that is the skimming of the best students to attend magnet or other county schools contributes to the erosion of our education system leaving the perception as a whole that some schools are doing better than others Following rules and guidelines is not enough to truly address the needs of the neediest students which often leaving educators drained and disillusioned without the desired results The philosophical basis of the Academy was that that learning reaches its optimal level only when students know and expect that all guidelines and policies are set forth as a basis for all decision making This requires clear goals and objectives consistency monitoring and feedback clear disciplinary policies and strong community and parental support It is essential for the philosophy of the school to shape the culture of school Interestingly Lawrence 1995 found that the type of school magnet school magnet program or traditional school was not as significant as the degree of self efficacy of the students The degree of self efficacy is determined by a student s perception of control of his her of their environment and circumstances Bandura 1980 The study found students that were at traditional schools with a high degree of self efficacy generally performed as well academically as their counterparts in magnet programs or magnet schools Hence this study suggests that developing a student s self efficacy is a worthwhile investment academically
