Old Norse-Icelandic Literature Carol J. Clover, John Lindow, 2019-06-30 The current revival of interest in the rich and varied literature of early Scandinavia has prompted a corresponding interest in its background its origins social and historical context and relationship to other medieval literatures Even readers with a knowledge of Old Norse and Icelandic have found these subjects difficult to pursue however for up to date reference works in any language are few and none exist in English To fill the gap six distinguished scholars have contributed ambitious new essays to this volume The contributors summarize and comment on scholarly work in the major branches of the field Eddic and skaldic poetry family and kings sagas courtly writing and mythology Taken together their judicious and attractively written essays each with a full bibliography make up the first book length survey of Old Norse literature in English and a basic reference work that will stimulate research in these areas and help to open up the field to a wider academic readership

areas of Old Norse Icelandic studies to explore questions related to not only the storyworlds of medieval Icelandic literature but also those of legal and learned texts and to the way that they are built Together they inquire into the nature of these worlds into their preservation and transmission in manuscripts their transmediality transnarrativity and reception In doing so these inquiries showcase the breadth of new perspectives on medieval Icelandic literature made possible by the application of narratological theory in its study A Lesser Thing ,2005
