Old Glasgow Streets Rudolph Kenna, 1990 *Nineteenth-Century Photographs and Architecture* Micheline Nilsen, 2017-07-05 Eschewing the limiting idea that nineteenth century architecture photography merely reflects functionality the objective of this collection is to reflect the aesthetic intellectual and cultural concerns of the time The essays hold appeal for social and cultural historians as well as those with an interest in the fields of art history urban geography history of travel and tourism Nineteenth century photographers captured what could be seen and what they wanted to be seen Their images informed of exploration progress heritage and destruction Architecture was a staple subject for the first generation of photographers as it patiently tolerated the long exposures of the early processes During its formative decades photography responded to evolutionary cultural forces of market and artistic production Photographs of architecture reflected a specific political or social context modulated through individual points of view For this reason the examination of each photographic image as a primary visual document and an aesthetic object rather than a technical milestone on a chronological trajectory affords a richer multi faceted approach to the extensive and complex corpus of photographs taken by photographers all over the world This project acknowledges the importance of technique in the early decades of photography but focuses on the thematic content of the material It places the photography of architecture in an international context under the contemporary critical lens sharpened by theoretical and cultural examinations of the topic Catalogue Maggs Bros, 1923 *House Documents* United States House of Representatives, 1868 **The Publishers' Circular and Booksellers' Record of British and Foreign Literature** ,1901 **The Northwestern Miller** ,1908 *Engineering* ,1884 **British Books** ,1904 *Clearance and Improvement* Tom M. Devine, 2010-02-01 Social and economic changes included an increase in production of food and raw materials in turn sustaining the remarkable growth of towns and cities over this period However in the folk memory of Scotland the social and cultural costs of the revolution loom much larger the loss of land for many thousands of families the rise of individualism and the decline of neighborhood the death of old rural societies which had formed Scotland's character for many generations The drama and tragedy of Highland history during this period have attracted many authors whereas the Lowland experience that of the majority of Scots hardly any This book attempts to redress that balance and in so doing examines why this extraordinary era inextricably associated with failure famine and clearance in Gaeldom is remembered as one of improvements in the Lowlands where the folk memory of dispossession if it ever existed is long lost in collective amnesia In so doing Devine addresses an issue which goes right to the heart of the nation's past **The Publisher** ,1901
