Constructed Truths Thomas Zoglauer, 2023-02-09 In a world in which more and more fake news is being spread it is becoming increasingly difficult to distinguish truth from lies knowledge from opinion Disinformation campaigns are not only perceived as a political problem but the fake news debate is also about fundamental philosophical questions What is truth How can we recognize it Is there such a thing as objective facts or is everything socially constructed This book explains how echo chambers and alternative worldviews emerge it blames post factual thinking for the current truth crisis and it shows how we can escape the threat of truth relativism

The Daily Wad Paul Anderson, 2012-04-19 Some years ago I noticed that certain verses and even brief phrases seemed to stand out from Bible passages I read during my daily devotions I found myself thinking about meditating on ruminating the words throughout the day It amused me to picture myself chewing my cud I shouldn't have been surprised The Bible does say we are his people the sheep of his pasture Psalm 100 3 b NIV and sheep chew a cud Other pictures came to mind a baseball player as he chewed a wad of bubble gum an old codger with a chew of tobacco tucked into one cheek The more delicate expression would be in reference to Mary the mother of Jesus Of her the Scriptures record But Mary treasured up all these things and pondered them in her heart Luke 2 19 NIV The meaning is the same You thrill to God's Word you chew on Scripture day and night Psalm 1 23 The Message So was born my daily wad I wrote the phrases on cards thought about the words throughout the day and shared them with others as opportunity presented itself I was blessed others were blessed My prayer is that you will be blessed as you read ruminate and are refreshed by *The Daily Wad*

The Power of Paradox: Impossible Conversations Markus Locker, 2019-05-07 This book argues that all truths systems include paradoxes Paradoxes such as found in the sciences philosophy and religion offer themselves as mutually shared partners in a dialogue of arguably incommensurable truths on the basis of their underlying truth Paradoxes leap beyond the epistemic border of individual truth claims A dialogue of truths grounded in paradox reaches before and at the same time past singular truths A paradox based dialogue of truths elevates the communication of disciplines such as the sciences and religion to a meta discourse level from which differences are not perceived as obstacles for dialogue but as complementary aspects of a deeper and fuller truth in which all truths are grounded

Quantum Theoretic Machines A. Stern, 2000-12-08 Making Sense of Inner Sense Terra cognita is terra incognita It is difficult to find someone not taken aback and fascinated by the incomprehensible but indisputable fact there are material systems which are aware of themselves Consciousness is self cognizing code During homo sapiens s relentness and often frustrated search for self understanding various theories of consciousness have been and continue to be proposed However it remains unclear whether and at what level the problems of consciousness and intelligent thought can be resolved Science s greatest challenge is to answer the fundamental question what precisely does a cognitive state amount to in physical terms Albert Einstein insisted that the fundamental ideas of science are essentially simple and can be expressed in a language comprehensible to everyone When one thinks about the complexities which present themselves in modern physics and even more so in the physics of life one may wonder whether Einstein really meant what he said Are we to consider the fundamental problem of the mind whose understanding seems to lie outside the limits of the mind to be essentially simple too Knowledge is neither automatic nor universally deductive Great new ideas are typically counterintuitive and outrageous and connecting them by simple logical steps to existing knowledge is often a hard undertaking The notion of a tensor was needed to provide the general theory of relativity the notion of entropy

had to be developed before we could get full insight into the laws of thermodynamics the notice of information bit is crucial for communication theory just as the concept of a Turing machine is instrumental in the deep understanding of a computer To understand something consciousness must reach an adequate intellectual level even more so in order to understand itself Reality is full of unending mysteries the true explanation of which requires very technical knowledge often involving notions not given directly to intuition Even though the entire content and the results of this study are contained in the eight pages of the mathematical abstract it would be unrealistic and impractical to suggest that anyone can gain full insight into the theory that presented here after just reading abstract In our quest for knowledge we are exploring the remotest areas of the macrocosm and probing the invisible particles of the microcosm from tiny neutrinos and strange quarks to black holes and the Big Bang But the greatest mystery is very close to home the greatest mystery is human consciousness The question before us is whether the logical brain has evolved to a conceptual level where it is able to understand itself Shelves G.J.P.,2014-09-22 The universe is a closed room without windows yet with movable shelves and boxes stuffed with anachronistic books and racks Knowledge is always fragmentary dynamic only temporarily sedimentary and thus it lies on the racks Someday there ll be on the shelves ours the only virtual volume of truth with its multiple entries that makes up for the only truth of everything Shelves a conceptual dictionary tries to define and entwine the many different concepts that altogether conform the ordered whole opening at the same time new perspective and consideration to everything that surrounds and contains us notwithstanding preconceptions and the mainstream We are on our way to master the universe Let us be patient Or not
