The Picture World of Combat Aircraft R. J. Stephen, 1990-01-01 An introduction to the various types of warplanes used by today's air forces *The Picture World of Combat Aircraft* R. J. Stephen, 1990-01-01 An introduction to the various types of warplanes used by today's air forces *Combat Aircraft of the United States Air Force* Michael Green, 2016-07-30

When the United States Army Signal Corps created the Aeronautical Division in August 1907 it had a mission to take charge of all matters pertaining to military ballooning air machines and all kindred matters That small inconsequential portion of the US Army would grow progressively over the many decades to become a separate service named the US Air Force in 1947 following the Second World War Overnight it became the world's most powerful military establishment able to deliver conventional and nuclear ordnance anywhere around the globe Today's cutting edge example of this power projection is the supersonic bat winged B 2 Spirit stealth bomber which can fly at an altitude of 50 000 feet and is built of carbon graphite composite materials The B 2 Spirit is a far cry from the early days of the service when it relied on fragile prop driven wood and fabric aerial platforms such as the Wright Type B which could barely reach an altitude of 100 feet In between have been such iconic Second World War aircraft as the P 51 Mustang and P 47 Thunderbolt fighters and bombers such as the B 25 Mitchell B 17 Flying Fortress and B 29 Super Fortress which dropped the first A Bomb in 1945 The Cold War demanded ever more powerful aircraft such as the B 58 Hustler and B 52 Stratofortress and fighters including the F 86 Sabre F 104 Starfighter and F 4 Phantom All these aircraft and more are vividly illustrated and described in detail in this superb Images of War publication [Military Persuasion in War and Policy](#) Stephen J. Cimbala, 2002-10-30 Cimbala analyzes military persuasion the art of using armed force to support diplomacy deterrence crisis management unconventional conflicts peace operations and other military activities short of major conventional war As he shows military persuasion requires that policy makers and diplomats understand the subtle interaction between force and diplomacy each supports or destroys the other depending upon the situation Even conventional wars have aspects of armed persuasion The Powell doctrine that calls for overwhelming force in case of any U S military intervention was not even employed by then Chairman of the Joint Chiefs of Staff Colin Powell in the Gulf War of 1991 despite the popular impression to the contrary Since U S policy is not based on imperial policing but on constructive engagement with the object of supporting democratic regimes and market economies the use of deterrence and limited military commitments of highly trained specialized warrior diplomats will be typical of 21st century conflicts As Cimbala shows in his various case studies armed forces are used most of the time for coercion not for mass destruction Yet much professional military thinking expert lay opinion and U S government analysis presupposes that there is a clear dividing line between all out peace and all out war In addition U S political culture is insensitive to the requirement for matching the political objective to the military means available as opposed to clamoring for a psychologically satisfying form of victory Despite these apparent obstacles Cimbala maintains that the United States must master military persuasion

because its resources for defense are limited and its commitments are ubiquitous This book will be of particular interest to scholars students and professionals involved with defense security and foreign policy studies
