Human Impacts on Ancient Marine Ecosystems Torben C. Rick, Jon M. Erlandson, 2008-04-29 An excellent volume with mature sophisticated comprehensive research by leaders in the fields of archaeology zooarchaeology and paleoarchaeology that will be useful to scientists of many interests David Steadman author of Extinction and Biogeography of Tropical Pacific Birds This volume will make a significant contribution to our understanding of ancient human impacts on marine ecosystems which will be of interest to all researchers who are concerned about the environment The editors and contributors are commended for their efforts on this significant research topic Steven R James coeditor of The Archaeology of Global Change The Impact of Humans on Their Environment *Archaeology in New Zealand*, 2001 *Taking the High Ground* Atholl Anderson, Douglas J. Kennett, 2012-11-01 This volume brings the remote and little known island of Rapa firmly to the forefront of Polynesian archaeology Thirteen authors contribute 14 chapters covering not only the basic archaeology of coastal sites rock shelters and fortifications but faunal remains agricultural development and marine exploitation The results presented within a chronology framed by Bayesian analysis are set against a background of ethnohistory and ethnology Highly unusual in tropical Polynesian archaeology are descriptions of artefacts of perishable material Taking the High Ground provides important insights into how a group of Polynesian settlers adapted to an isolated and in some ways restrictive environment

Fishing in Pre-European New Zealand Foss Leach, 2006 This authoritative volume draws together a broad range of information about pre European Maori fishing in a well illustrated and very readable form The author uses identifications and measurements of fish remains from 126 archaeological sites covering the full time span of prehistoric New Zealand to describe the range of fish caught by pre European Maori explore variations between regions and through time and examine the impact of Maori on the fishery The archaeological information is placed in a series of wider contexts the Pacific background to Maori fishing the nature of the New Zealand fishery climatic fluctuations during the last millennium and the nutritional requirements of human diet and the role of marine food in it The discussion of the technology and material culture of fishing breaks new ground in its treatment of cordage and knots netting and fish hooks canoe design fish preservation and cooking methods Research on fish behaviour towards hooks provides much needed insight into the reason why the rotating hook so common amongst early Maori and other Pacific island peoples was so successful The author shows that pre European Maori had a different approach to conservation of the marine environment than is currently employed in modern fisheries management and that claims of pre European over exploitation of snapper and other species are ill founded An especially important finding is that the average size of fish increased over time following the strategy of taking large numbers of what would now be considered under sized fish New Zealand had super abundant fish stocks right up to the time of first European

settlement and all necessary marine food was obtained in shallow waters less than 100 m from the shore Pre European Maori fishermen in New Zealand are shown to have been extremely knowledgeable about all aspects of the New Zealand fishery

New Zealand Journal of Archaeology, 2005 *Fish Catching Methods of the World* Otto Gabriel, Klaus

Lange, Erdmann Dahm, Thomas Wendt, 2008-04-15 In the sixteen years since the last edition of Von Brant's classic work was published fishing and fisheries have undergone vast changes Not only has there been great progress in the development of new tools materials and techniques but the industry has seen an increasing need to address controversial issues such as declining fish stocks enormous quantities of bycatch and discard and the impact of towed fishing gear on the environment Fully revised and updated to reflect such changes the fourth edition of this widely read and popular book offers A unique comprehensive survey of the evolution of fishing methods throughout the world Approximately 750 illustrations showing the extensive range of methods techniques and equipment used in fishing across the globe Fishing gear classified according to the FAO system Additional chapters Fishing Effects on Fish Stocks and Environment and Fishery and Gear Research All researchers fisheries scientists fisheries students administrators and libraries in universities and research establishments where fish and fisheries are studied and taught will find this book a valuable addition to their shelves Commercial and sports fishermen will also find *Fish Catching Methods of the World* a fascinating and vital reference Tangata Whenua Atholl

Anderson, Judith Binney, Aroha Harris, 2014-11-15 *Tangata Whenua An Illustrated History* charts the sweep of M ori history from ancient origins through to the twenty first century Through narrative and images it offers a striking overview of the past grounded in specific localities and histories The story begins with the migration of ancestral peoples out of South China some 5 000 years ago Moving through the Pacific these early voyagers arrived in Aotearoa early in the second millennium AD establishing themselves as tangata whenua in the place that would become New Zealand By the nineteenth century another wave of settlers brought new technology ideas and trading opportunities and a struggle for control of the land Survival and resilience shape the history as it extends into the twentieth century through two world wars the growth of an urban culture rising protest and Treaty settlements Today at the beginning of the twenty first century M ori are drawing on both international connections and their ancestral place in Aotearoa Fifteen stunning chapters bring together scholarship in history archaeology traditional narratives and oral sources A parallel commentary is offered through more than 500 images ranging from the elegant shapes of ancient taonga and artefacts to impressions of M ori in the sketchbooks and paintings of early European observers through the shifting focus of the photographer's lens to the response of contemporary M ori artists to all that has gone before The many threads of history are entwined in this compelling narrative of the people and the land the story of a rich past that illuminates the present and will inform the future **Polynesian Mythology and Ancient**

Estimating Live Fish Catches from

Archaeological Bone Fragments of Snapper, Pagrus Auratus Foss Leach,1995 Five paired cranial bones and the otoliths of a modern sample of 110 New Zealand snapper Pagrus auratus were weighed and measured and regression analysis performed against live fork length and ungutted weight A number of regression models and alternative steps in arriving at estimates were examined Detailed analysis of residuals was used to distinguish between strategies Fork length could be estimated with a standard error of less than 20mm and weight to less than 140 g For the latter a two step procedure is suggested from bone dimension to fork length and from this to live weight using a sample of 833 fish Coefficients are provided for 64 equations linking bone size to live characteristics To reconstruct a size frequency histogram of a prehistoric fish catch it is acceptable to measure all bones from a particular species even though the number of measurements may greatly exceed the MNI Minimum Number of Individuals for that species Publisher s description
