Mary Tiemann

Safe Drinking Water Act:

25 years of the Safe Drinking Water Act : history and trends , Safe Drinking Water Act (SDWA) Mary Tiemann,2011-04 The Safe Drinking Water Act SDWA is the key federal law for protecting public water supplies from harmful contaminants First enacted in 1974 and substantially amended in 1986 and 1996 the act is administered through programs that establish standards and treatment requirements for public water supplies control underground injection of wastes finance infrastructure projects and protect sources of drinking water This report summarizes the SDWA and its major programs and regulatory requirements It includes summaries of the principal environmental statutes administered by the EPA Also includes the drinking water security provisions added to the SDWA in 2002 Charts and tables This is a print on demand publication *Safe Drinking Water Act and Its Interpretation* Thomas W. Carter,2006 Key drinking water issues include problems caused by specific contaminants such as the gasoline additive methyl tertiary butyl ether MTBE perchlorate and lead as well as the related issue of the appropriate federal role in providing financial assistance for water infrastructure projects Congress last reauthorised the Safe Drinking Water Act SDWA in 1996 and although funding authority for most SDWA programs expired in FY2003 broad reauthorization efforts are not expected as EPA states and water utilities remain busy implementing the requirements of the 1996 amendments Concerns about perchlorate in drinking water also have returned to the congressional agenda after the past Congress enacted several provisions on this issue H R 213 has been introduced to require EPA to set a drinking water standard for perchlorate in 2007 and a January 2005 National Academy of Sciences report on the health effects of perchlorate has increased oversight interest in perchlorate regulatory activities at EPA Concerns over the security of the nation s drinking water supplies were addressed by the 107th Congress through the Bioterrorism Preparedness Act P L 107 188 which amended SDWA to require community water systems to conduct vulnerability assessments and prepare emergency response plans Subsequent congressional action has involved oversight and funding of water security assessment and planning efforts and research An ongoing SDWA issue involves the growing cost and complexity of drinking water standards and the ability of water systems especially small rural systems to comply with standards The issue of the cost of drinking water standards particularly the new arsenic standard has merged with the larger debate over the federal role in assisting communities with financing drinking water infrastructure an issue that has become more challenging in a time of tightened budgets Congress authorized a drinking water state revolving fund DWSRF program in 1996 to help communities finance projects needed to meet standards For FY2005 Congress provided 843 million for the DWSRF program and the President has requested 850 million for FY2006 Notwithstanding this program studies show that a large funding gap exists and will grow as SDWA requirements increase and infrastructure ages Safe Drinking Water Act Mary Tiemann,2008 This report summarizes the Safe Drinking Water Act SDWA and its major programs and regulatory requirements It excerpts with several additions the SDWA chapter of CRS Report RL30798 Environmental Laws

Summaries of Major Statutes Administered by the Environmental Protection Agency EPA which provides summaries of the principal environmental statutes administered by the Environmental Protection Agency EPA This report includes the drinking water security provisions added to the SDWA by the Public Health Security and Bioterrorism Preparedness and Response Act of 2002 P L 107 188 The Safe Drinking Water Act Title XIV of the Public Health Service Act is the key federal law for protecting public water supplies from harmful contaminants First enacted in 1974 and substantially amended in 1986 and 1996 the act is administered through programs that establish standards and treatment requirements for public water supplies control underground injection of wastes finance infrastructure projects and protect sources of drinking water The 1974 law established the current federal state arrangement in which states may be delegated primary implementation and enforcement authority for the drinking water program The state administered Public Water Supply Supervision Program remains the basic program for regulating the nation s public water systems and 49 states have assumed this authority The last major reauthorization of the act was done through the Safe Drinking Water Act Amendments of 1996 P L 104 182 which generally authorized appropriations for SDWA programs through FY2003 As with other EPA administered statutes having expired funding authority Congress has continued to appropriate funds for the ongoing SDWA programs In addition to reviewing key programs and requirements of the SDWA this report includes statistics on the number and types of regulated public water systems It also provides tables that list all major amendments with the year of enactment and public law number and that cross reference sections of the act with the major U S Code sections of the codified statute
