Safeguarding the Land Gloria Skurzynski, 1981-01-01 Traces the careers of three women involved in public land management and outlines opportunities for those interested in this field *The Oxford Handbook of Media and Social Justice* Srividya Ramasubramanian, Omotayo O. Banjo, 2024-09-13 The urgency and complexity of contemporary social justice issues facing the world today mean that activists scholars and storytellers need a readily available compendium of cutting edge scholarship on media and social justice The Oxford Handbook of Media and Social Justice gathers over forty leading scholars and presents a state of the art systematic overview of media and social justice Representing leading voices across positionalities and perspectives geographies and generations meta theories and methods and issues and identities the Handbook explores intersecting identities social structures and power networks within media ownership representation selection uses effects networks and social transformation These theories methods and practices expose media and digital divides polarization marginalization exclusion alienation invisibilities stigma and trivializations Yet they also showcase how individuals and communities also have agency through refusal and resistance Each of the 32 chapters includes a brief history key concepts contemporary debates and dialogues and future directions and the volume concludes with reflections on resistances reckoning and reparative justice Connecting critical media scholarship with intersectional feminism postcolonial anticolonial theory Indigenous approaches queer theory diaspora studies and environmental justice frameworks the Handbook re envisions the role of media and technology with an inclusive trauma informed approach to scholarship that is essential for the future of this research *GeoTech4Tenure* Food and Agriculture Organization of the United Nations, International Fund for Agricultural Development, 2022-07-30 In line with the Voluntary Guidelines on the Responsible Governance of Tenure VGGT public and private investments globally are increasingly recognising responsible land governance as a determinant for the success and sustainability of their achievements Investment managers understand that preventing and mitigating tenure related issues is a necessary step to achieve their objectives While a wide range of tools community based participatory approaches and technologies are available to help clarify protect and secure tenure rights navigating this landscape requires expertise which is often not available to investment projects This guide provides readers with a basic understanding of the functional linkages between land tenure and land based investments It illustrates the process of protecting and securing legitimate tenure rights through recordation describes how to use fit for purpose technology to strengthen support the process identifies choices in selecting the appropriate technology based on objectives and context and provides clear criteria to inform the choice *Power / Knowledge / Land* Laura German, 2022-10-10 The 2008 outcry over the global land grab made headlines around the world leading to a sustained interest in the dynamics and fate of customary land among both academics and development practitioners In *Power Knowledge Land* author Laura German profiles the consolidation of a global knowledge regime surrounding land and its governance within international

development circles in the decade following this outcry and the growing enrollment of previously antagonistic actors within it Drawing theoretical insights on the inseparability of power and knowledge German reveals the dynamics of knowledge practices that have enabled the longstanding project of commodifying customary land and the more contemporary interests in acquiring and financializing it to be advanced and legitimated by capturing the energies of socially progressive forces By bringing theories of change from the emergent land governance orthodoxy into dialogue with the ethnographic evidence from across the African continent and beyond concepts masquerading as universal and self evident truths are provincialized and their role in commodifying customary land and entrenching colonial futurities put on display In doing so the volume brings wider academic debates surrounding productive forms of power into the heart of the land grab debate while enhancing their accessibility to a wider audience Power Knowledge Land takes current scholarly debates surrounding land grabs beyond their theoretical moorings in critical agrarian studies political economy and globalization into contemporary debates surrounding the politics of knowledge from theories of coloniality to ontological anthropology thereby enabling new dynamics of the phenomenon to be revealed The book deploys a pioneering epistemology integrating deconstructionist approaches to reveal the tactics truth claims and ontological assumptions of global knowledge brokers with systematic qualitative reviews and comparative study to contrast these dominant constructs with the evidence and reveal alternative ways of knowing land and practicing security from the ethnographic literature This helps to reveal the Western and modernist biases in the narratives that have been advanced about women custom and security revealing how the coloniality of knowledge works to grease the wheels of land takings by advancing highly provincialized constructs aligned with western interests as universal truths
