Safeguarding the Atom David Fischer, Paul Szasz, 2020-11-19 Safeguards play a key role in verifying the effectiveness of restraints on the spread of nuclear weapons Originally published in 1985 this book is a study of the safeguards system of the International Atomic Energy Agency an important element of the non proliferation regime It breaks new ground by focusing on the politics of safeguards especially the political problems of the IAEA and of the day to day application of safeguards It contains a critical appraisal and proposals for ways of improving existing procedures and of adapting them to the political and technological changes of recent years Safeguarding the Atom gives an analysis of the following questions What are IAEA safeguards and how do they work How effective are they How can they be reinforced What sanctions can be imposed in the event of non compliance IAEA safeguards represent the world s first and so far only attempt to verify an arms control agreement by systematic on site inspection and their applicability to other arms control measures is examined

Combating Weapons of Mass Destruction Nathan E. Busch, Daniel Joyner, 2009-01-01 The spread of weapons of mass destruction poses one of the greatest threats to international peace and security in modern times the specter of nuclear chemical and biological weapons looms over relations among many countries The September 11 tragedy and other terrorist attacks have been painful warnings about gaps in nonproliferation policies and regimes specifically with regard to nonstate actors In this volume experts in nonproliferation studies examine challenges faced by the international community and propose directions for national and international policy making and lawmaking The first group of essays outlines the primary threats posed by WMD proliferation and terrorism Essays in the second section analyze existing treaties and other normative regimes including the Nuclear Non Proliferation Treaty and the Chemical Weapons and Biological Weapons Conventions and recommend ways to address the challenges to their effectiveness Essays in part three examine the shift some states have made away from nonproliferation treaties and regimes toward more forceful and proactive policies of counterproliferation such as the Proliferation Security Initiative which coordinates efforts to search and seize suspect shipments of WMD related materials

World Inventory of Plutonium and Highly Enriched Uranium, 1992 David Albright, Frans Berkhout, William Walker, 1993 From the John Holmes Library collection **Nuclear Safeguards and the International Atomic Energy Agency**, 1995 From the dawn of the nuclear age nuclear power has been recognized as a dual use technology The same nuclear reactions that give bombs the destructive force of many thousands of tons of high explosive can

when harnessed in a controlled fashion produce energy for peaceful purposes The challenge for the international nuclear nonproliferation regime the collection of policies treaties and institutions intended to stem the spread of nuclear weapons is to prevent nuclear proliferation while at the same time permitting nuclear energy s peaceful applications to be realized One of the key institutions involved in meeting these two objectives is the International Atomic Energy Agency IAEA an international organization created in 1957 as a direct outgrowth of president Eisenhower s Atoms for Peace program The IAEA Statute which creates the legal framework for the agency charges it to accelerate and enlarge the contribution of atomic energy to peace health and prosperity throughout the world At the same time it gives the agency the authority to enter into so called safeguards agreements with individual nations or groups of nations to ensure that nuclear materials equipment or facilities are not used to produce nuclear weapons The IAEA s mission and its safeguards responsibilities were extended with the enactment in 1970 of the Treaty on the Non Proliferation of Nuclear Weapons also known as the Non Proliferation Treaty or NPT The Treaty requires non nuclear weapon states that are parties to the accord to enter into safeguards agreements with the IAEA covering all nuclear materials on their territory e g uranium and plutonium whether in forms directly usable for weapons or forms that require additional processing before becoming usable in weapons

Nuclear Non-Proliferation and Global Security David B. Dewitt, 2020-11-19 The nuclear non proliferation treaty had recently undergone its third formal review by its signatories who had assessed its effectiveness and considered how it might better be implemented This book originally published in 1987 written by experts many of whom were leading participants in the nuclear non proliferation treaty regime at the time examines the whole range of issues connected with nuclear non proliferation and the treaty It looks at non proliferation from the point of view of nuclear nations non nuclear nations and the nuclear industry It assesses the work of the international monitoring bodies and reconsiders the place of non proliferation in the changing balance of global nuclear power It concludes by discussing the way forward **Verification** Francesco
