Tunnel Congress 2019 Naples Italy 3 9 May 2019 The use of underground space is continuing to grow due to global
urbanization public demand for efficient transportation and energy saving production and distribution The growing need for
space at ground level along with its continuous value increase and the challenges of energy saving and achieving sustainable
development objectives demand greater and better use of the underground space to ensure that it supports sustainable
resilient and more liveable cities This vision was the source of inspiration for the design of the logos of both the International
ITA and Italian SIG Tunnelling Association By placing key infrastructures underground the black circle in the logos it will be
possible to preserve and enhance the quality of the space at ground level the green line In order to consider and value
underground space usage together with human and social needs engineers architects and artists will have to learn to
collaborate and develop an interdisciplinary design approach that addresses functionality safety aesthetics and quality of life
and adaptability to future and varied functions The 700 contributions cover a wide range of topics from more traditional
subjects connected to technical challenges of design and construction of underground works with emphasis on innovation in
tunneling engineering to less conventional and archetypically Italian themes such as archaeology architecture and art The
book has the following main themes Archaeology Architecture and Art in underground construction Environment
sustainability in underground construction Geological and geotechnical knowledge and requirements for project
implementation Ground improvement in underground constructions Innovation in underground engineering materials and
equipment Long and deep tunnels Public communication and awareness Risk management contracts and financial aspects
Safety in underground construction Strategic use of underground space for resilient cities Urban tunnels Tunnels and
