Armstrong,1976 **Saint francis : nature mystic; the derivation and significance** Edward Allworthy Armstrong,1973 **St. Francis of Assisi and Nature** Roger D. Sorrell,1988-12-08 One of the best loved saints of all time Francis of Assisi is often depicted today as a kind of proto hippie or early environmentalist This book the most comprehensive study in English of Francis s view of nature in the context of medieval tradition debunks modern anachronistic interpretations arguing convincingly that Francis s ideas can only be understood in their 13th century context Through close analysis of Francis s writings particularly the Canticle of the Sun Sorrell shows that many of Francis s beliefs concerning the proper relation of humanity to the natural world have their antecedents in scripture and the medieval monastic orders while other ideas and practices his nature mysticism his concept of familial relationships with created things and his extension of chivalric conceptions to interactions with creatures are entirely his own Sorrell insists however that only by seeing Francis in terms of the Western traditions from which he arose can we appreciate the true originality of this extraordinary figure and the relevance of his thought to modern religious and environmental concerns *This Sacred Earth* Roger S. Gottlieb,1996 This is the first comprehensive survey of the critical connections between religion nature and the environment It includes writings from sacred texts and a broad spectrum of new eco theological selections Historical and contemporary selections from key authors and a multicultural range of sources make This Sacred Earth an invaluable teaching resource and a unique introduction to the theory and practice of religious environmentalism *The Medieval Discovery of Nature* Steven A. Epstein,2012-09-28 This book examines the relationship between humans and nature that evolved in medieval Europe over the course of a millennium From the beginning people lived in nature and discovered things about it Ancient societies bequeathed to the Middle Ages both the Bible and a pagan conception of natural history These conflicting legacies shaped medieval European ideas about the natural order and what economic moral and biological lessons it might teach This book analyzes five themes found in medieval views of nature grafting breeding mules original sin property rights and disaster to understand what some medieval people found in nature and what their assumptions and beliefs kept them from seeing *Nature* Peter Coates,2013-04-26 Nature is a deceptively simple and ahistorical term suggesting intrinsic unchanging reality Yet nature has a history too both in terms of human attitudes and human impacts Coates outlines the major understandings of nature in the western world since classical times from nature as higher authority to its more recent meaning of threatened physical space and life forms Unlike many others this book places the history of attitudes to nature within the story of human induced changes in the material environment And few others take a supranational

perspective or cross the divides between historical eras A distinctive unifying theme is Coates's interest in how green writers over the last thirty years have interpreted our past dealings with nature specifically their efforts to diagnose the roots of contemporary ecological problems and their search for ancestors He concludes with a discussion of the future of nature in the context of developments such as the new ecology global warming advances in genetic engineering and research on animal behaviour Assuming no previous knowledge Nature provides the reader with an accessible synthesis and introduction to some of environmental history's central features and debates confirming its status as one of the most enthralling current pursuits within historical studies This will be essential reading for second year undergraduates and above in cultural history and environmental history as well as to the general reader interested in environmental issues **Attunement** Clifford Chalmers Cain, 2019-12-20 We live in a century in which we must either change our way of regarding and acting toward nature or else imperil our survival as a species and jeopardize as well the fate of the planet itself This book by a theologian and environmental scientist examines four religious figures from European and Asian contexts who could aid us in developing a more sustainable and caring orientation which would allow us to live more in tune with creation twelfth century German nun Hildegard of Bingen thirteenth century Italian monk and patron saint of ecology Francis of Assisi nineteenth century Japanese Zen monk and poet Taigu Ry kan and the first pontiff from Latin America twenty first century Pope Francis By emphasizing our intimate and unavoidable organic connection with the network of all life and our charge to care for and protect it they point us in the direction of a new paradigm a healthier perspective a metanoia a change of heart mind attitude and action that would partner what we know about nature an environmental consciousness with what we do an ecological conscience Our children our grandchildren and our great grandchildren deserve at least this much *Roads to Utopia* David Greenstein, 2014-02-12 As the greatest book of Jewish mysticism the Zohar is a revered and much studied work Yet surprisingly scholarship on the Zohar has yet to pay attention to its most unique literary device the presentation of its insights while its teachers walk on the road In these pages rabbi and scholar David Greenstein offers the first examination of the walking on the road motif Greenstein's original approach hones in on how this motif expresses the struggles with spatiality and the everyday presented in the Zohar He argues that the walking theme is not a metaphor for realms to be collapsed into or transcended by the holy as conventional interpretations would have it Rather it conveys us into those quotidian spaces that are obdurately present alongside the realm of the sacred By embracing the reality of mundane existence and recognizing the prosaic dimensions of the worldly path the Zohar is an especially exceptional mystical treatise In this volume Greenstein makes visible a singular though previously unstudied achievement of the Zohar *Francis of Assisi and His "Canticle of Brother Sun"* Reassessed B. Moloney, 2013-10-09 Bringing the skills of a literary historian to the subject Brian Moloney considers the genesis of Saint Francis of Assisi's Canticle of Brother Sun to show how it works as a carefully composed work of art The study examines the saint's life and times the structure of the poem the features of its

style and the range of its possible meanings **Environmental Values in Christian Art** Susan Power Bratton,

God-Curious Stephen Cherry, 2017-02-21 Why study theology Getting to the heart of this question Stephen Cherry demonstrates the appeal of exploring the unknown and the unknowable and reveals how theology the most interdisciplinary of all subjects is fascinating fun and important to our lives today *The Torah and the Stoics on humankind and nature* J.J. Boersema, 2021-09-06 The environmental problematique is intimately bound up with deep seated human attitudes regarding our relationship with nature Here in the west those attitudes have been shaped to no small degree by the canonical texts of the Bible and the classical philosophers In this book the author re examines some of these seminal texts arguing that what we today know as Christian cosmology is in fact a grafting of classical Greek philosophy onto ancient Israelite thought with certain valuable traditions being all but lost in the process The dietary laws of Leviticus and Deuteronomy in particular still prove surprisingly relevant today Often misread on this point the creation narratives of Genesis can likewise serve as a rich point of departure for examining our attitudes towards the natural world A reappraisal of these sources is necessary and feasible There is no need for an appeal to cosmologies alien to our own culture nor for recourse to New Age beliefs in all their variety What are the Animals to Us? David Aftandilian, 2007 In What Are the Animals to Us scholars from a wide variety of academic disciplines explore the diverse meanings of animals in science religion folklore literature and art

The Marvellous and the Monstrous in the Sculpture of Twelfth-century Europe Kirk Ambrose, 2013 Richly illustrated consideration of the meaning of the carvings of non human beings from centaurs to eagles found in ecclesiastical settings Representations of monsters and the monstrous are common in medieval art and architecture from the grotesques in the borders of illuminated manuscripts to the symbol of the green man widespread in churches and cathedrals These mysterious depictions are frequently interpreted as embodying or mitigating the fears symptomatic of a dark age This book however considers an alternative scenario in what ways did monsters in twelfth century sculpture help audiences envision perhaps even achieve various ambitions Using examples of Romanesque sculpture from across Europe with a focus on France and northern Portugal the author suggests that medieval representations of monsters could service ideals whether intellectual political religious and social even as they could simultaneously articulate fears he argues that their material presence energizes works of art in paradoxical even contradictory ways In this way Romanesque monsters resist containment within modern interpretive categories and offer testimony to the density and nuance of the medieval imagination KIRK AMBROSE is Associate Professor Chair Department of Art and Art History University of Colorado Boulder **God and the Crisis of**

Freedom Richard Bauckham, 2002-01-01 This book outlines a biblical understanding of freedom and the particular ways in which Christians choose to exercise that freedom in response to major issues confronting the world today Specifically Bauckham constructs a Christian understanding of freedom explores the authority of Scripture in modern and postmodern contexts and also examines themes of tradition ethics oppression and ecology as they relate to issues of freedom and

authority *Holy and Noble Beasts* David Salter, 2001 It argues that through their depictions of animals medieval writers were not only able to reflect upon their own humanity but were also able to explore the meaning of more abstract values and ideas such as civility sanctity and nobility that were central to the culture of the time BOOK JACKET
