Saints** Kate M. Craig,2021-04-22 Mobile Saints examines the central medieval ca 950 1150 CE practice of removing saints
relics from rural monasteries in order to take them on out and back journeys particularly within northern France and the Low
Countries Though the permanent displacements of relics translations have long been understood as politically and culturally
significant activities these temporary circulations have received relatively little attention Yet the act of taking a medieval
relic from its home even for a short time had the power to transform the object the people it encountered and the landscape
it traveled through Using hagiographical and liturgical texts this study reveals both the opportunities and tensions associated

displays of competition mockery and resistance By contextualizing these effects within the discourses and practices that
surrounded traveling relics Mobile Saints emphasizes the complexities of the central medieval cult of relics and its
participants while speaking to broader questions about the role of movement in negotiating the relationships between sacred
