On the Frontiers of History Tessa Morris-Suzuki, 2020-08-17 Why is it that we so readily accept the boundary lines drawn around nations or around regions like Asia as though they were natural and self-evident when in fact they are so mutable and often so very arbitrary What happens to people not only when the borders they seek to cross become heavily guarded but also when new borders are drawn straight through the middle of their lives The essays in this book address these questions by starting from small places on the borderlands of East Asia and looking outwards from the small towards the large asking what these minor pasts tell us about the grand narratives of history In the process it takes the reader on a journey from Renaissance European visions of Tartary through nineteenth century racial theorising imperial cartography and indigenous experiences of modernity to contemporary debates about Big History in an age of environmental crisis

Richardson reveals broad alternatives and possibilities for Russian identity in Asia After the dissolution of the Soviet Union in 1991 when Russia was suffering the fragmentation of empire and a sudden decline in its international standing these disputed islands became symbolic of a much larger debate on self-image nationalism national space and Russia's place in world politics When viewed through the prism of the Southern Kurils ideas associated with the border state and nation become destabilized uncovering new insights into state-society relations in modern Russia At the Edge of the Nation explores how disparate groups of political elites have attempted to use these islands to negotiate enduring tensions within Russia's identity and traces how the destiny of these isolated yet evocative islands became irrecoverably bound to the destiny of Russia itself
