Salamis in Cyprus Basos Karagiōrgēs,1969 **Ancient Building in Cyprus** George R. H. Wright,1992 The wealth of excavation in Cyprus conducted across a period of nearly a century and a half has revealed much evidence of ancient building of all functional categories This picture extends over a vast range of time ca 10 000 years since Cyprus is probably the place where the earliest substantial building known the Neolithic round house style is better presented than anywhere else in the world It is the aim of this book to set forth and document the building tradition which hitherto has received no detailed exposition The book will fill several gaps in the library shelves at one and the same time architectural history that presents all the archaeological evidence Religion and Social Transformations in Cyprus Giorgos Papantoniou,2012-10-16 This monograph focuses on religion to explore how the socio cultural infrastructure of Cyprus was affected by the transition from segmented administration by many Cypriot kings to the island wide government by a foreign Ptolemaic correspondent It approaches politico religious ideological responses and structures of symbolism through the study of sacred landscapes specific iconographic elements and archaeological contexts and architecture as well as through textual and epigraphic evidence A fresh approach to the transition is put forward connecting the island more emphatically with its longue dur e Moving beyond the field of Cypriot studies this work also serves as a paradigm for the study of religion in relation to social power in other fields of classics and in particular for the enrolment of other areas of the Mediterranean into the political and cultural Hellenistic oikoumene **Greek Writing from Knossos to Homer** Roger D. Woodard,1997-06-12 Greek Writing from Knossos to Homer examines the origin of the Greek alphabet Departing from previous accounts Roger Woodard places the advent of the alphabet within an unbroken continuum of Greek literacy beginning in the Mycenaean era He argues that the creators of the Greek alphabet who adapted the Phoenician consonantal script were scribes accustomed to writing Greek with the syllabic script of Cyprus Certain characteristic features of the Cypriot script for example its strategy for representing consonant sequences and elements of Cypriot Greek phonology were transferred to the new alphabetic script Proposing a Cypriot origin of the alphabet at the hands of previously literate adapters brings clarity to various problems of the alphabet such as the Greek use of the Phoenician sibilant letters The alphabet rejected by the post Bronze Age Mycenaean culture of Cyprus was exported west to the Aegean where it gained a foothold among a then illiterate Greek people emerging from the Dark Age *The Maritime Economy of Ancient Cyprus in Terms of the New Institutional Economics* Andreas P. Parpas,2022-05-05 This study considers the maritime economy of ancient Cyprus from 1450 BC to 295 BC combining for the first time three distinct disciplines that is History Archaeology and Economic theory The principles of New Institutional Economics are used to trace the island s institutions and their continuity and to reconstruct its maritime history **Cypriote Antiquities in the Medelhavsmuseet, Stockholm** Vassos Karageorghis,Carl-Gustaf Styrenius,Marie-Louise Winbladh,Medelhavsmuseet (Stockholm, Sweden),1977 A Study of the Circulation of Ceramics in

Cyprus from the 3rd Century BC to the 3rd Century AD John Lund, 2015-10-26 This is the first monograph devoted solely to the ceramics of Cyprus in the Hellenistic and Roman Periods The island was by then no longer divided into kingdoms but unified politically first under Ptolemaic Egypt and later as a province in the Roman Empire Submission to foreign rule was previously thought to have diluted if not obliterated the time honoured distinctive Cypriot character The ceramic evidence suggests otherwise The distribution of local and imported pottery in Cyprus points to the existence of several regional exchange networks a division that also seems reflected by other evidence The similarities in material culture exchange patterns and preferential practices are suggestive of a certain level of regional collective self awareness From the 1st century BC onwards Cyprus became increasingly engulfed by mass produced and standardized ceramic fine wares which seem ultimately to have put many of the indigenous makers of similar products out of business or forced them to modify their output Also the ceramic record gradually became less diverse during the Roman Period than before developments which we today might be inclined to view as symptoms of an early form of globalisation *The Archaeology of Cyprus* Arthur Bernard Knapp, 2013-03-18 This book examines the archaeology of Cyprus from the first known human presence during the Late Epipalaeolithic through the end of the Bronze Age **Cyprus Within the Biblical World** James H. Charlesworth, Jolyon G. R. Pruszinski, 2021-03-25 This volume moves discussion of ancient Israelite culture beyond concepts of isolation and borders factoring in already well known insights from classical studies and ancient history that take greater account of the impressive connections between all the countries bordering the Mediterranean Sea Specifically the contributors focus on Cyprus and the Bible and offer archaeological and biblical insights to consider how and in what ways Cyprus and Cypriot culture was related to biblical life and perceptions Though the Mediterranean separated Palestine from Cyprus it also joined them archaeological finds expose significant trade relations and cultural commonalities not only in the Hellenistic and late Roman eras but for many centuries prior These relations developed and became even more intimate in the later biblical period as evidenced by early Jewish and Christian writings By exploring various methods of cultural contact the contributors suggest that further examination of cultural links between Cyprus and Palestine in the biblical period can repay dividends in understanding the development of ancient Israelite religion early Judaism and early Christianity The Swedish Cyprus Expedition: pt.3. The Hellenistic and Roman periods in Cyprus, by O. Vessberg and A. Westholm Svenska Cypren expedition, 1972 **Material Connections in the Ancient Mediterranean** Peter van Dommelen, A. Bernard Knapp, 2010-09-23 Material Connections eschews outdated theory tainted by colonialist attitudes and develops a new cultural and historical understanding of how factors such as mobility materiality conflict and co presence impacted on the formation of identity in the ancient Mediterranean Fighting against hyper specialisation within the subject area it explores the multiple ways that material culture was used to establish maintain and alter identities especially during periods of transition culture encounter and change A new perspective is adopted one that perceives the use of material culture by prehistoric and historic Mediterranean

peoples in formulating and changing their identities It considers how objects and social identities are entangled in various cultural encounters and interconnections The movement of people as well as objects has always stood at the heart of attempts to understand the courses and process of human history The Mediterranean offers a wealth of such information and Material Connections expanding on this base offers a dynamic new subject of enquiry the social identity of prehistoric and historic Mediterranean people and considers how migration colonial encounters and connectivity or insularity influence social identities The volume includes a series of innovative closely related case studies that examine the contacts amongst various Mediterranean islands Sardinia Corsica Sicily Crete Cyprus the Balearics and the nearby shores of Italy Greece North Africa Spain and the Levant to explore the social and cultural impact of migratory colonial and exchange encounters Material Connections forges a new path in understanding the material culture of the Mediterranean and will be essential for those wishing to develop their understanding of material culture and identity in the Mediterranean

The Oxford History of the Archaic Greek World Paul Cartledge, Paul Christesen, 2025-06-20 The ancient Greek world consisted of approximately 1 000 autonomous polities scattered across the Mediterranean basin and was remarkable for both its diversity and its uniformity As Greeks dispersed throughout the Mediterranean the different environmental and human ecosystems they encountered created important differences among widely scattered settlements each Greek community developed its own unique set of socio political institutions and social practices Nonetheless despite their dispersal and diversity Greek communities were bound together by a network of commercial cultural diplomatic and military ties and shared important commonalities most notably language and religion The Oxford History of the Archaic Greek World a collaborative effort by more than forty eminent scholars offers twenty one detailed and comprehensive studies of key sites from across the Greek world in the period between c 750 and c 480 BCE During that period Greeks confronted a series of demographic political social and economic challenges and generated an array of responses that transformed the ways in which they lived worked and interacted Much of what is now seen as distinctive about Greek culture such as democracy stone temples and nude athletics first developed during the Archaic period The series is organized alphabetically by polis Volume III contains detailed and up to date studies of Cumae and Pithecusae The Cyclades and Cyprus Together with the other volumes in the series the Oxford History of the Archaic Greek World offers a new and unique resource for the study of ancient Greece that will transform how we understand a crucial era in antiquity

Human Sacrifice in Ancient Greece Dennis D. Hughes, 2013-01-11

Numerous ancient texts describe human sacrifices and other forms of ritual killing in 480 BC Themistocles sacrifices three Persian captives to Dionysus human scapegoats called pharmakoi are expelled yearly from Greek cities and according to some authors they are killed Locrin girls are hunted down and slain by the Trojans on Mt Lykaion children are sacrificed and consumed by the worshippers and many other texts report human sacrifices performed regularly in the cult of the gods or during emergencies such as war and plague Archaeologists have frequently proposed human sacrifice as an explanation for their discoveries from Minoan Crete children's bones with knife cut marks the skeleton of a youth lying on a platform with a bronze blade resting on his chest skeletons sometimes bound in the dromoi of Mycenaean and Cypriot chamber tombs and dual man woman burials where it is suggested that the woman was slain or took her own life at the man's funeral If the archaeologists' interpretations and the claims in the ancient sources are accepted they present a bloody and violent picture of the religious life of the ancient Greeks from the Bronze Age well into historical times But the author expresses caution In many cases alternative if less sensational explanations of the archaeological are possible and it can often be shown that human sacrifices in the literary texts are mythical or that late authors confused mythical details with actual practices Whether the evidence is accepted or not this study offers a fascinating glimpse into the religious thought of the ancient Greeks and into changing modern conceptions of their religious behaviour

A Wayside Shrine in Northern Moab: Excavations in the Wadi ath-Thamad P. M. Michele Daviau, Margreet L. Steiner, 2017-08-31 Major recent excavations have shed much light on the complexity of Iron Age society and religion in southern Palestine a region where both Judeans and Edomites lived However it is not clear whether the religious practices attested at these sites were a reflection of localised customs or were common rituals for peoples of Cisjordan and we do not know their extent An isolated shrine site at Wadi ath Thamad Site WT 13 in northern Moab which contained numerous finds of Iron Age figurines and statues has been the subject of detailed excavation The rich harvest of figurines ceramic statues beads miniature ceramic vessels architectural models faunal remains and shells and fossils constitutes the evidence for repeated cultic activities Although dating to the Iron Age at the time of the consolidation of the kingdom of Moab there is insufficient evidence at present to determine the full range of cultic practices and deities venerated by the peoples of the lands within ancient Moab and by those visitors to the shrine The links between WT 13 and the surrounding town sites is only now coming to light with excavation at Atarus and Khirbat al Mudayna as well as at the Ammonite site of Tall Damiyah in the Jordan Valley where a comparable shrine has recently been uncovered WT 13 clearly serves as a link between the Jordan Valley and the Negev adding to our knowledge of local and foreign influences in the region during the Iron Age

Phoenicia J. Brian Peckham, 2014-10-30 Phoenicia has long been known as the homeland of the Mediterranean seafarers who gave the Greeks their alphabet But along with this fairly well known reality many mysteries remain in part because the record of the coastal cities and regions that the people of Phoenicia inhabited is fragmentary and episodic In this magnum opus the late Brian Peckham examines all of the evidence currently available to paint as complete a portrait as is possible of the land its history its people and its culture In fact it was not the Phoenicians but the Canaanites who invented the alphabet what distinguished the Phoenicians in their turn was the transmission of the alphabet which was a revolutionary invention to everyone they met The Phoenicians were traders and merchants the Tyrians especially thriving in the back and forth of barter in copper for Levantine produce They were artists especially the Sidonians known for gold and silver masterpieces engraved with scenes from the stories they told and which they exchanged for iron and eventually steel and they were builders like the Byblians who taught the alphabet and numbers as elements of their trade When the Greeks went west the Phoenicians went with them Italy was the first destination settlements in Spain eventually

followed but Carthage in North Africa was a uniquely Phoenician foundation The Atlantic Spanish settlements retained their Phoenician character but the Mediterranean settlements in Spain Sicily Sardinia and Malta were quickly converted into resource centers for the North African colony of Carthage a colony that came to eclipse the influence of the Levantine coastal city states An emerging independent Western Phoenicia left Tyre free to consolidate its hegemony in the East It became the sole west Asiatic agent of the Assyrian Empire But then the Babylonians let it all slip away and the Persians intent on war and world domination wasted their own and everyone s time trying to dominate the irascible and indomitable Greeks The Punic West Carthage made the same mistake until it was handed off to the Romans But Phoenicia had been born in a Greek matrix and in time had the sense and good grace to slip quietly into the dominant and sustaining Occidental culture This complicated history shows up in episodes and anecdotes along a frangible and fractured timeline Individual men and women come forward in their artifacts amulets or seals There are king lists and alliances companies and city assemblies Years or centuries are skipped in the twinkling of any eye and only occasionally recovered Phoenicia like all history is a construct a product of historiography an answer to questions The history of Phoenicia is the history of its cities in relationship to each other and to the peoples cities and kingdoms who nourished their curiosity and their ambition It is written by deduction and extrapolation by shaping hard data into malleable evidence by working from the peripheries of their worlds to the centers where they lived by trying to uncover their mentalities plans beliefs suppositions and dreams in the residue of their products and accomplishments For this reason the subtitle Episodes and Anecdotes from the Ancient Mediterranean is a particularly appropriate description of Peckham s masterful posthumous volume the fruit of a lifetime of research into the history and culture of the Phoenicians

Archaeology and the Emergence of Greece Anthony M. Snodgrass, 2006 The papers in this book presume to stray across the traditional boundaries with the domains of prehistorians ancient historians and literary critics It had been regarded as somehow out of order for Classical archaeologists to meddle with social political and economic history or with topics that involved the entire Old World or with testing the historical veracity of ancient authors or with the intellectual presuppositions of ancient artists At heart my experience has been not so much of swimming across the tide as of working across the grain of the subject from the Preface In the past few decades the aims subject matter and methods of classical archaeology have changed beyond recognition Archaeology and the Emergence of Greece collects twenty five essays by A M Snodgrass the leading authority on the archaeology of early Greece that led the way in this transformation Snodgrass emphasizes the Iron Age as the formative period in the making of Classical Greece and elaborates upon this link by commenting on literature history anthropology Aegean and European prehistory and Roman provincial archaeology This volume for which Snodgrass has written new introductions to each essay will become required reading for students and scholars of the ancient world The essays have been chosen and organized to facilitate classroom use
