Romanesque Sculpture in Italy G.H. Crichton, 2025-06-01 Romanesque Sculpture in Italy 1954 is a comprehensive analysis of the resurgence of sculpture in Italy The variety of the political economic and racial conditions which existed in Italy towards the end of the eleventh century led to a corresponding diversity in the renaissance of sculpture with each region showing the impress of local circumstances **Catalog of the Avery Memorial Architectural Library of**

Columbia University: Rodg - Sculpture I Avery Library, 1968 *The Grove Encyclopedia of Medieval Art and Architecture* Colum Hourihane, 2012 This volume offers unparalleled coverage of all aspects of art and architecture from medieval Western Europe from the 6th century to the early 16th century Drawing upon the expansive scholarship in the celebrated Grove Dictionary of Art and adding hundreds of new entries it offers students researchers and the general public a reliable up to date and convenient resource covering this field of major importance in the development of Western history and international art and architecture The Nave Sculpture of Vézelay Kirk Ambrose, 2006 This scholarly work fundamentally changes the way we think about the monastic church of Vézelay and its sculptures Kirk Ambrose provides a new account of the celebrated sculptural ensemble at this important French Romanesque monastic church Whereas scholarly attention in the past has focused almost exclusively on the Pentecostal portal Ambrose devotes most of his analysis to the nave capitals He considers how these works intersect with various aspects of monastic culture from poetry to a sign language used during observed periods of silence From this study it emerges how many of the sculptures resonated with communal practices and with interpretive modes in use at the site Deeming the attempt to uncover an underlying or unifying program to be an anachronistic project Ambrose explores historically specific ways this ensemble cohered for medieval viewers Covering a range of themes including hagiography ornament and violence he develops alternative approaches for the examination of serial imagery As a result this book has broad implications for the study of eleventh and twelfth century art in the West **BOOK JACKET** Romanesque Sculpture in Campania Dorothy F. Glass, 1991 This first comprehensive study in English of Romanesque sculpture in Campania places the material in the context of South Italian medieval culture Although medieval Campania was part of the Norman kingdom which at its zenith included almost all of South Italy it has distinguishable characteristics that set it apart from its neighbors the emphatic imprint of the Roman past a long lived Lombard settlement the authoritative conservatism of the abbey of Monte Cassino the lack of Byzantine dominance and close political and cultural ties with Sicily In this sense Romanesque sculpture in Campania is very much a local phenomenon for it

evolved from a close study of local antiquity and the selective adaptation of elements from neighboring provinces From its beginning Romanesque sculpture in Campania is characterized by attention to small scale decorative motifs seen on both portals and capitals By the latter part of the twelfth century an avid interest in stone pulpits and paschal candelabra fostered both internal consistency in local workshops and specifically Campanian content in part inspired by the local liturgy Dorothy Glass s study urges that the definition of Romanesque be both expanded and extended chronologically to include the southern Mediterranean

connoisseurship Dorothy F Glass delves instead into the historical and historiographical context for a group of significant monuments erected in Italy between the last decade of the eleventh century and the first third of the twelfth century In her reading local culture takes precedence over names context over connoisseurship she argues that it was the cultural intellectual and religious life of the abbeys of San Benedetto Po and Nonantola that provided the framework for the Reformist ethos of much of the sculpture adorning the cathedral of Modena Glass argues that the monuments are deeply rooted in the concerns of the reform of the church more commonly known as the Gregorian Reform that these reform ideas and ideals were first fomented in monastic communities and then adopted by the new cathedrals built in cities that freed of submission to imperial German rule had recently rejoined the papal fold The Sculpture of Reform in North Italy ca 1095 1130 History and Patronage of Romanesque Fa es moves scholarship beyond continuously reiterated opinions concerning style attribution chronology origins and influence instead opening new and fruitful lines of inquiry into the patronage and historical significance of these extraordinary monuments
