Salmon Protection and the B.C. Coastal Forest Industry Anthony H. J. Dorcey, Michael W. McPhee, Sam Sydneysmith, Economic Council of Canada, Westwater Research Centre, 1980      *The Coastal Zone* Kenneth Ruddle, William B. Morgan, James R. Pfafflin, 1988      *Regulatory Reform in Canada* W. T. Stanbury, Fred Thompson, Institute for Research on Public Policy, 1982 From the Introduction This study examines the nature of and prospects for regulatory reform in Canada In particular we are concerned with the elimination of liberalization of direct regulation in such industries as telecommunications airlines trucking and agriculture In focusing our attention on the prospects for reforming direct regulation in Canada we do not wish to slight the potential value of reforming the regulatory process But most procedural reforms focus on the margin or flow of new regulation while deregulation proper is aimed at reducing the enormous stock already in existence Within the field of direct regulation we have further narrowed our analysis to the role of the federal government as regulator      **Land and its Uses — Actual and Potential** F. T. Last, M. C. B. Hotz, B. G. Bell, 2013-03-08 During its existence the Ecosciences Panel of the North Atlantic Treaty Organisation was constantly concerned with i the communication gap between the generators of ecological environmental information and those who use it and ii the narrow interpretation of environmental which too frequently was taken as being synonymous with pollution Because of this concern and because the panel recognised that land use is perhaps the overriding facet of environmental policy it was decided to arrange the Seminar recorded in this volume Land and its Uses Actual and Potential An Environmental Appraisal The development of this Seminar was chaired by Professor F T Last who was enthusiastically supported by B G Bell U K Drs S Bie Norway O W Heal U K R Herrmann Federal Republic of Germany M C B Hotz formerly of NATO Belgium but now in Canada L Munn Canada and N Yassoglou Greece Together they decided that the participants should include i planners decision makers and ii scientists generating ecological environmental information in the hope that they would gain a better understanding of each others problems and attitudes and as a result identify how information can be prepared in a more usable form

Assessment of Stream Protection Practices in the Interior of the Prince Rupert Forest Region David R. Bustard, 1986 The analysis presented in this report provides a preliminary review of the measures presently incorporated into forestry operations for stream protection in the interior sections of the Prince Rupert Forest Region of British Columbia It also attempts to evaluate the effectiveness of these measures and to identify their weaknesses The analysis is based on interviews field examinations undertaken in summer fall 1985 Introductory sections describe the research methods used summarize the historical development of stream protection measures in the province and reviews studies on the effects of forest harvesting on British Columbia interior streams Section 5 summarizes in two parts the results of the interviews field inspections The first part discusses those measures taken in the immediate streamside zone especially techniques for timber removal at the forest stream interface The second part discusses upslope measures such as road construction maintenance silvicultural

prescriptions and rate of cut considerations that influence stream systems The final sections synthesize overall conclusions and make recommendations for further research      **Global Environmental Forest Policies** Constance

McDermott, Benjamin Cashore, Peter Kanowski, 2010-08-12 Market globalization and the globalization of environmental concerns have spurred demand for greater international accountability for forest stewardship In response a range of multi lateral governmental and non governmental initiatives have emerged to redefine the rules of global trade and demand verification of the legality and or sustainability of forest products originating from within and outside national boundaries At the same time there is a lack of transparency and shared understanding about the environmental forest policies that already exist within the world s leading forest producing and consuming countries The result is that many stakeholders have developed perceptions about a country s regulatory environment that are not consistent with what is actually taking place This book provides a uniquely detailed and systematic comparison of environmental forest policies and enforcement in twenty countries worldwide covering developed transition and developing economies The goal is to enhance global policy learning and promote well informed and precisely tuned policy solutions      **Impacts of Forestry Practices on a Coastal Stream**

**Ecosystem, Carnation Creek, British Columbia** G. F. Hartman, J. C. E. Scrivener, Canada. Department of Fisheries and Oceans, 1990 Results from the first 17 years of a multi disciplinary study about the effects of logging activities on a small stream ecosystem in the coastal rainforest of British Columbia have been reviewed The main hydrological fluvial geomorphological thermal and production relationships are integrated in four schematic illustrations Applications of results to land use planning are also discussed      *Environmental Assessment in Australia and Canada* Westwater Research Centre, 1981      **The Real World of Pollution Control** Mark Sproule-Jones, Westwater Research Centre, 1980

**Bargaining in the Governance of Pacific Coastal Resources** Anthony H. J. Dorsey, 1986      **Canadian Bulletin of Fisheries and Aquatic Sciences** , 1990      **A Handbook for Fish Habitat Protection on Forest Lands in British Columbia** David Andrew Alan Toews, M. J. Brownlee, Canada. Department of Fisheries and Oceans. Pacific Region. Land Use Unit, 1981 Guidelines to effect fisheries habitat protection during forestry operations Sections include aquatic ecosystems and fisheries resources resource management for fisheries and forestry and forest harvesting practices their impacts on aquatic ecosystems and measures for protection      **ForesTalk** , 1979      *Talk and Log* Jeremy Wilson, 1998 For more than three decades British Columbia s old growth forests have been a major source of political conflict In *Talk and Log* Jeremy Wilson presents a comprehensive account of the rise of the wilderness movement examines the forest industry s political strategies and analyzes the inner workings of the policy process Wilson describes a number of major political battles such as those resulting in preservation of South Moresby the Carmanah and the Valhalla wilderness and investigates the factors that pushed the government towards a more comprehensive approach to expanding the protected areas system He considers a wide range of forest policy developments and assesses the effectiveness of government and industry attempts to

contain the wilderness movement In the final part he explores the Harcourt NDP government's reform initiatives including the Commission on Resources and Environment CORE the Protected Areas Strategy and the Forest Practices Code Talk and Log illuminates the forces behind controversies that have divided British Columbians preoccupied the provincial government and drawn the attention of people across Canada and the world By discussing the patterns and trends underlying the past three decades of wilderness politics Wilson identifies the currents likely to dominate B C wilderness debates in decades to come

Fishes and Forestry Thomas G. Northcote, G. F. Hartman, 2008-04-15 Many species of fish occupying inland waters reside in watersheds that were or still are surrounded by forests and are dependent in major ways upon such cover The interactions between fishes and forests are complex multifaceted dynamic processes involving most in land surface waters forests subsurface waters geology and soils climate and its changes and the biotic components of the relevant ecosystems These interactions also include the aspects of forestry tied to human development economics population growth and even philosophies Fishes and Forestry is truly a landmark publication The editors Professors Northcote and Hartman have drawn together and carefully edited chapters written by 56 scientists from around the world covering a vast wealth of information never before appearing within the covers of one book Following an introductory chapter this exceptional work is broadly divided into sections covering the ecology of forests streams lakes and estuaries fish biology and ecology forestry activities and their effects on aquatic systems and fishes 14 chapters covering examples of fish forestry interactions from around the world and a final section covering means of effecting better fish forestry interactions Fishes and Forestry is an essential purchase for all those involved in inland fisheries forestry and their interaction including fisheries scientists fish biologists ecologists environmental scientists and forestry scientists Libraries in all universities and research establishments where these subjects are studied and taught should have several copies on their shelves
