Pennell,B.A. Barton,1996-10-11 As salmonids have been reared for more than a century in many countries one might expect that principles are well established and provide a solid foundation for salmonid aquaculture Indeed some of the methods used today in salmonid rearing are nearly identical to those employed one hundred years ago Areas of salmonid research today include nutrition smolt and stress physiology genetics and biotechnology The purpose of this book is to provide a useful synthesis of the biology and culture of salmonid fishes The important practices in salmonid culture as well as the theory behind them is described This volume will be of interest to students researchers fisheries biologists and managers as well as practising aquaculturists *The Economic Value of Wilderness* ,1992 MARKET INTEGRATION BETWEEN WILD AND FARMED FISH IN MEDITERRANEAN COUNTRIES Food and Agriculture Organization of the United Nations,2018-11-08 Market integration occurs when prices among different locations or related goods follow similar patterns over time Current knowledge on market integration between aquaculture and wild caught fish is based on a small number of species and markets Most studies show the existence of market integration between wild and farmed conspecifics However there are some ambiguous results for European seabass and gilthead seabream in southern European countries in the literature In this study we investigate the existence of market integration between wild and farmed conspecifics for European seabass and gilthead seabream as well as several other key species in southern European countries
