AIDS Narratives Steven F. Kruger, 2013-10-28 This is the first book length study of the rich fiction that has emerged from the AIDS crisis Examining first the ways in which scientific discourse on AIDS has reflected ideologies of

gender and sexuality such as the construction of AIDS as a disease of gay men part of a battle over masculinity and thus largely excluding women with AIDS from public attention the book considers how such discourses have shaped narrative understandings of AIDS On the one hand AIDS is seen as an invariably fatal weakening of an individual's bodily defenses a depiction often used to reconfirm an identification between disease and a weak and vulnerable gayness On the other hand AIDS is understood in terms of an epidemic attributable to gay immorality or unnaturalness The fiction of AIDS depends upon these two narratives with one major subgenre of AIDS novel presenting narratives of personal illness decline and death and a second focusing on epidemic spread These novels also question the narrative structures upon which they depend intervening particularly against the homophobia of those structures though also sometimes reinforcing it **The Advocate** ,1991

Daniel Defoe Paula R. Backscheider,2021-10-21 In this book Paula Backscheider considers Daniel Defoe's entire canon as related developing and in close dynamic relationship to the literature of its time In so doing she revises our conception of the contexts of Defoe's work and reassesses his achievement and contribution as a writer By restoring a literary context for modern criticism Backscheider argues the intensity and integrity of Defoe's artistic ambitions demonstrating that everything he wrote rests solidly upon extensive reading of books published in England his understanding of the reading tastes of his contemporaries and his engagement with the issues and events of his time Defoe the dedicated professional writer and innovator emerges with a new wholeness and certain of his novels assume new significance Defoe's literary status continues to be debated and misunderstood Even critical studies of the novel often begin with Richardson rather than Defoe By moving from Defoe's poetry pamphlets and histories to the novels Backscheider offers an argument for the thematic and stylistic coherency of his oeuvre and for a recognition of the dominant place he held in shaping the English novel For example Defoe deserves to be recognized as the true originator of the historical novel for three of his fictions are deeply engaged with just those conceptual and technical issues common to all later historical fiction And Roxana now appears as Defoe's deliberate attempt to enter the fastest growing market for fiction that for women readers What have been powerfully significant for the history of the novel then are the very characteristics of his writing that have been held against his literary stature its contemporaneity its mixed and untidy form its formal realism its concentration on the life of an individual and its probing of the individual's psychological interaction with the empirical world making that world representative even as it is referential It is exactly these characteristics most original prominent and subsequently imitated in Defoe's fiction that define the form we call novel **Advances in Thermal Energy Storage Systems** Luisa F. Turning Points and Transformations Christine DeVine, 2011-07-12 From the Irish Cailleach and other shape shifters of folk legends to modern movie transformers from Ovid's *Metamorphoses* to the moment when Gregor Samsa woke up one morning to find himself transformed into an insect in Kafka's novella from conversion narratives to slave narratives turning points and transformations have always been central to literary works and to cultural developments In fact with Freytag's pyramid in mind one could claim that all literary works focus on the trope of a transformation born of a turning point because such moments comprise the very essence and vitality of human life and culture But why are turning points necessarily transformational and in what way And what brings about those turning points in language literature culture and human lives These are essentially the questions the essays in this volume seek to answer The contributors examine turning points and transformations personal literary and cultural brought about through the randomness of the universe as well as through human interference and discuss ways in which humans in general and writers in particular through their art experience and cope with the ineluctable results
