11 ideas clave : el desarrollo de la competencia científica Aureli . . . [et al. Caamaño, Pedro Cañal, Antonio de Pro Bueno, 2012-09 Desea contribuir a clarificar la cuestión no sólo teóricamente sino a través de propuestas concretas para trabajarla en el aula con ejemplos prácticos Se trata pues de comprender el significado del término competencia científica y su relación con conceptos y enfoques anteriores ponderando así su utilidad para orientar la enseñanza de las ciencias El libro presenta una estructura clara que ayuda a la comprensión de cada una de las ideas que se proponen Las ideas clave planteadas responden a preguntas tales como Debe centrarse la enseñanza de las ciencias en el desarrollo de la competencia científica Qué conceptos y teorías científicas deben incluirse en el currículo Conviene enseñar la ciencia de manera contextualizada Qué tipo de actividad integra mejor el aprendizaje de los procedimientos científicos La enseñanza de las ciencias debe ayudar al desarrollo de la competencia en comunicación lingüística Deben analizarse en el aula las implicaciones sociales de la ciencia y la tecnología Cómo promover el interés por la ciencia Cómo evaluar en clase el desarrollo

de la competencia científica **Relevant Chemistry Education** Ingo Eilks, Avi Hofstein, 2015-07-22 This book is aimed at chemistry teachers, teacher educators, chemistry education researchers and all those who are interested in increasing the relevance of chemistry teaching and learning as well as students' perception of it. The book consists of 20 chapters. Each chapter focuses on a certain issue related to the relevance of chemistry education. These chapters are based on a recently suggested model of the relevance of science education encompassing individual, societal and vocational relevance, its present and future implications as well as its intrinsic and extrinsic aspects. Two highly distinguished chemical educators, Ingo Eilks and Avi Hofstein, have brought together 40 internationally renowned colleagues from 16 countries to offer an authoritative view of chemistry teaching today. Between them, the authors in 20 chapters give an exceptional description of the current state of chemical education and signpost the future in both research and in the classroom. There is special emphasis on the many attempts to enthuse students with an understanding of the central science chemistry which will be helped by having an appreciation of the role of the science in today's world. Themes which transcend all education such as collaborative work, communication skills, attitudes, inquiry, learning and teaching and problem solving are covered in detail and used in the context of teaching modern chemistry. The book is divided into four parts which describe the individual, the societal, the vocational and economic and the non-formal dimensions and the editors bring all the disparate leads into a coherent narrative that will be highly satisfying to experienced and new researchers and to teachers with the daunting task of teaching such an intellectually demanding subject. Just a brief glance at the index and the references will convince anyone interested in chemical education that this book is well worth studying. It is scholarly and readable and has tackled the most important issues in chemical education today and in the foreseeable future. Professor David Waddington, Emeritus Professor in Chemistry Education, University of York, United Kingdom. *Enseñanza de las ciencias desde la perspectiva ciencia-tecnología-sociedad* Pedro Membiela, Pedro Membiela Iglesia, 2002-03-25 The main purpose of the CTS education is to promote literacy in science and technology so that the citizens can participate in the democratic process of the taking of decisions and to promote civic action in the resolution of problems related with science and the technology in our society.

Salter's Advanced Chemistry George Burton, 2000-08-30 This advanced chemistry text has been updated to match the specification for A Level Chemistry from September 2000. It contains Chemical Storylines, Chemical Ideas and sample material from the Activities and Assessment Pack and Teacher's Guide together with the Salter's Advanced Chemistry syllabus and further information. The new editions of all the texts in this series should make it easier for teachers to match their teaching to the new modular specification. *The School Science Review*, 2000 *Sinnstiftende Lehr-Lernprozesse initiieren* Bernd Ralle, Jörg Thiele, 2019 Sinnstiftung durch kontextorientiertes Lernen: also die Rückbindung der Lerngegenstände an die persönlichen Lebenswelten der Lernenden findet seit einiger Zeit wieder eine breitere Beachtung in der Lehr-Lernforschung. In Bezug auf die Auswahl relevanter Gegenstände ihre didaktische Kontextualisierung und die intendierte

Initiierung sinnstiftender Lernprozesse zeigen sich allerdings in erziehungswissenschaftlichen und fachdidaktischen Forschungen bislang nur vereinzelte Bemerkungen zu den dahinter liegenden Wirkungsprozessen sodass bisher kaum Antworten auf die Frage vorliegen wie sich fachliche oder lebensweltbezogene Kontexte auf Wissen und Können sowie Motivation und soziales Verhalten der Schülerinnen und Schüler auswirken Ziel des Bandes ist es daher sich nicht nur aus theoretischer sondern auch aus empirischer Perspektive mit der Bedeutung von alltags wie auch fachnahen Kontexten für die Initiierung von sinnstiftenden Lehr Lernprozessen in unterschiedlichen Fachdidaktiken auseinanderzusetzen

Science Education for Gifted Learners Keith S. Taber, 2007-04-13 Asks how science teachers can make their classes more stimulating and challenging for the most able students to encourage them to continue their science education beyond compulsory schooling

Making it relevant Peter Nentwig, David Waddington, 2006 Teaching in context has become an accepted and often welcomed way of teaching science in both primary and secondary schools The conference organised by IPN and the University of York Science Education Group Context based science curricula drew on the experience of over 40 science educators and 10 projects The book is arranged in four parts Part A consists of two papers one on situated learning and the other on implementation of new curricula Part B contains descriptions of five major curricula in different countries why they were introduced how they were developed and implemented and evaluation results Part C gives descriptions of three projects that are of smaller scale and their materials are used as interventions in other more conventional curricula There is also a contribution on some fundamental research where modules of work are written to examine how best to design context based curricula Finally Part D consists of two chapters one summarising some of the findings that came out of the chapters in the three earlier parts and the second looks at the future
