Forgotten Scriptures Lee Martin McDonald, 2009-01-01 The early Christian church had a variety of Scriptures and other source material that informed their faith and shaped their thinking But after a few centuries the church decided to keep the twenty seven books of our present New Testament and to treat them as a canonical in faith and practice But what of the other books Many of them have survived and remain valuable for understanding the diversity of the early Christian church and the astounding claims of faith on which it was founded Learning about these ancient documents need not threaten the church's current orthodoxy and authority in fact learning about these texts can help today's Christians form a deeper understanding of the early church

The Western Time of Ancient History Alexandra Lianeri, 2011-03-31 This book examines the conceptual and temporal frames through which modern Western historiography has linked itself to classical antiquity In doing so it articulates a genealogical problematic of what history is and a more strictly focused reappraisal of Greek and Roman historical thought Ancient ideas of history have played a key role in modern debates about history writing from Kant through Hegel to Nietzsche and Heidegger and from Friedrich Creuzer through George Grote and Theodor Mommsen to Momigliano and Moses Finley yet scholarship has paid little attention to the theoretical implications of the reception of these ideas The essays in this collection cover a wide range of relevant topics and approaches and boast distinguished authors from across Europe in the fields of classics ancient and modern history and the theory of historiography

Indigenous Theology and the Western Worldview (Acadia Studies in Bible and Theology) Randy S. Woodley, 2022-04-19 This volume by a Cherokee teacher former pastor

missionologist and historian brings Indigenous theology into conversation with Western approaches to history and theology. Written in an accessible conversational style that incorporates numerous stories and questions, this book exposes the weaknesses of a Western worldview through a personal engagement with Indigenous theology. Randy Woodley critiques the worldview that undergirds the North American church by dismantling assumptions regarding early North American histories and civilizations, offering a comparative analysis of worldviews and demonstrating a decolonized approach to Christian theology. Woodley explains that Western theology has settled for a particular view of God and has perpetuated that basic view for hundreds of years, but Indigenous theology originates from a completely different DNA. Instead of beginning with God created humanity, it begins with God created place. Instead of emphasizing individualism, it emphasizes a corporateness that encompasses the whole community of creation. And instead of being about the next world, it is about the tangibility of our lived experiences in this present world. The book encourages readers to reject the many problematic aspects of the Western worldview and to convert to a worldview that is closer to that of both Indigenous traditions and Jesus.

History of the British and Foreign Bible Society George Browne, 1859 **The Report of the British and Foreign Bible Society** British and Foreign Bible Society, 1902 Vols 1-64 include extracts from correspondence **The Bloomsbury Reader on Islam in the West** Edward E. Curtis, 2015-10-22

For more than a millennium, Islam has been a vital part of Western civilization. Today, however, it is sometimes assumed that Islam is a foreign element inside the West and even that Islam and the West are doomed to be in perpetual conflict. The need for accurate, reliable scholarship on this topic has never been more urgent. *The Bloomsbury Reader on Islam in the West* brings together some of the most important up-to-date scholarly writings published on this subject. The Reader explores not only the presence of Muslim religious practitioners in Europe and the Americas but also the impact of Islamic ideas and Muslims on Western politics, societies, and cultures. It is ideal for use in the university classroom, with an extensive introduction by Edward E. Curtis IV and a timeline of key events in the history of Islam in the West. A brief introduction to the author and the topic is provided at the start of each excerpt. Part 1 on the history of Islam in the West probes the role of Muslims and the significance of Islam in medieval, early modern, and modern settings such as Islamic Spain, colonial era Latin America, sixteenth-century France, nineteenth-century Crimea, interwar Albania, the post-World War II United States, and late twentieth-century Germany. Part 2 focuses on the contemporary West, examining debates over Muslim citizenship, the war on terrorism, anti-Muslim prejudice, and Islam and gender, while also providing readers with a concrete sense of how Muslims practise and live out Islamic ideals in their private and public lives.

African Origins of the Major "Western Religions" Yusef Ben-Jochannan, 1991 Dr. Ben critically examines the history, beliefs, and myths that are the foundation of Judaism, Christianity, and Islam. Mercer Dictionary of the Bible Watson E. Mills, Roger Aubrey Bullard, 1990 *Jesus Christ in History and Scripture* highlights two related bases for the current revolution in Jesus studies: 1. a critically chastened world view that is satisfied with provisional results, and 2. a creative or poetic use of
