Traffic Grooming for Optical Networks Rudra Dutta, Ahmed E. Kamal, George N. Rouskas, 2008-08-06 The objective of this book is to provide timely and comprehensive coverage of the principles technology practice and future of traffic grooming in optical networks Traffic grooming considerations are already shaping new switch designs and standards including next generation Synchronous Optical Network Synchronous Digital Hierarchy SONET SDH and Generic Framing Procedure GFP are affecting future optical network technologies and are creating new business opportunities Yet information on the topic is scattered and there is a shortage of

technical sources where relevant material can be accessed in a single location The motivation for this book was to bridge this gap by providing a single authoritative point of reference to the tra c grooming state of the art Tra c grooming is a complex subject involving a number of interrelated concepts standards and technologies It is also a rapidly growing eld of study making it difficult to cover all aspects in detail To cope with this scope and complexity this book provides appropriate background information followed by an in depth study of a few key issues and challenges It has been our intention to bring together a broad range of perspectives from preeminent researchers in both academia and industry We believe that these multiple diverse points of view add considerable value and make the contents more interesting to the reader **Core**
