IT has become a universal custom to obtain and preserve the likenesses of one's friends Photographs are the most popular form of these likenesses as they give the true exterior outlines and appearance except coloring of the subjects But how much more popular and useful does photography become when it can be used as a means of securing plates from which to print photographs in a regular printing press and what is more astonishing and delightful to produce the real colors of nature as shown in the subject no matter how brilliant or varied We quote from the December number of the Ladies Home Journal An excellent suggestion was recently made by the Department of Agriculture at Washington that the public schools of the country shall have a new holiday to be known as Bird Day Three cities have already adopted the suggestion and it is likely that others will quickly follow Of course Bird Day will differ from its successful predecessor Arbor Day We can plant trees but not birds It is suggested that Bird Day take the form of bird exhibitions of bird exercises of bird studies any form of entertainment in fact which will bring children closer to their little brethren of the air and in more intelligent sympathy with their life and ways There is a wonderful story in bird life and but few of our children know it Few of our elders do for that matter A whole day of a year can well and profitably be given over to the birds Than such study nothing can be more interesting The cultivation of an intimate acquaintanceship with our feathered friends is a source of genuine pleasure We are under greater obligations to the birds than we dream of Without them the world would be more barren than we imagine Consequently we have some duties which we owe them What these duties are only a few of us know or have ever taken the trouble to find out Our children should not be allowed to grow to maturity without this knowledge The more they know of the birds the better men and women they will be We can hardly encourage such studies too much Of all animated nature birds

are the most beautiful in coloring most graceful in form and action swiftest in motion and most perfect emblems of freedom They are withal very intelligent and have many remarkable traits so that their habits and characteristics make a delightful study for all lovers of nature In view of the facts we feel that we are doing a useful work for the young and one that will be appreciated by progressive parents in placing within the easy possession of children in the homes these beautiful photographs of birds The text is prepared with the view of giving the children as clear an idea as possible of haunts habits characteristics and such other information as will lead them to love the birds and delight in their study and acquaintance

Shorebird Ecology, Conservation, and Management Dr. Mark A. Colwell,2010-11-16 Shorebirds are model organisms for illustrating the principles of ecology and excellent subjects for research Their mating systems are as diverse as any avian group their migrations push the limits of endurance and their foraging is easily studied in the open habitats of estuaries and freshwater wetlands This comprehensive text explores the ecology conservation and management of these fascinating birds Beginning chapters examine phylogenetic relationships between shorebirds and other birds and cover shorebird morphology anatomy and physiology A section on breeding biology looks in detail at their reproductive biology Because shorebirds spend much of their time away from breeding areas a substantial section on non breeding biology covers migration foraging ecology and social behavior The text also covers shorebird demography population size and management issues related to habitat predators and human disturbances Throughout it emphasizes applying scientific knowledge to the conservation of shorebird populations many of which are unfortunately in decline *Birds* ,1901 **Birdscapes** ,2003
